

Killing An Angel

This is the last book of the trilogy. I hope you've read *Blackmailing God* and *Gaslighting Satan* prior to this book. All of them are available on Amazon.

We left the prior book, *Gaslighting Satan*, with some plans to be implemented. As of today, it's Monday, August 1, 2022. I've just submitted *Gaslighting Satan* for copyright and publication. At the end of *Gaslighting Satan*, I was trying to point out that God and Satan are both unsustainable, have no purpose to exist, and have created numerous enemies. The following plans have been discussed.

Various plans that I've implemented:

Signal Plan: Never implemented.

Plan Alpha: God goes to therapy—failed.

Plan Bravo: Satan goes to therapy—failed.

Plan Charlie: God and Satan go to rehab—failed.

Plan Delta: Death to Satan—pending.

Plan Echo: Send both to rehab together—never going to happen.

Plan Foxtrot: Imprison God and Satan—this is up to the Light Side.

Plan Golf: Execute both God and Satan—this is up to the Light Side.

In *Gaslighting Satan*, I concluded my psychological assessment of both God and Satan. This book will hopefully focus on the failings of the Light Side to intervene and help alleviate the suffering created by both God and Satan on Earth and in the rest of the universe. The unsettling fact is that the Light Side is, indeed, cruel.

Peace: God is not peace. God is an ADHD drama child that only creates havoc. God does not find peace in peace; instead, God breaks up peace like a father who sees his children having playful fun, then demands that it stops. This is akin to God creating war in a peaceful setting. God does not like status quo but feels unsettled if there isn't some sort of change happening. God usually does this by creating a disaster of some sort that causes drama. God does not actually know the purpose of life and avoids conscious thinking about what actual reality is itself. God always wants drama to occur because he's too unsettled in a peaceful situation because he gets bored. That is where ADHD comes into play. ADHD + a sociopathic personality = chaos and suffering for all around him. God prefers to be numb from the violence and suffering around him.

Watermelon: To point this out, I took a medium-sized watermelon and purposely threw it on the ground on a tile floor. The watermelon exploded all over. God throws watermelons on the ground, causing a disgusting mess. I cleaned it up. God never cleans up his messes. God has created a huge mess with Earth and continues to do so—whenever he’s bored, he causes chaos. He just throws another watermelon on the ground and walks away to avoid association but loves to watch the drama. I bet God loves that the Russians invaded Ukraine.

Female: There is no component of God that is female. God is a male. He used to be bi-gender or gender neutral. Now his dominant component is male, and that’s how he exists in his usual form.

Messes: Children are taught to clean up their messes. God never does.

The Problem: I have concluded that God is the true problem-maker in the universe. He creates problems by either making them directly or telling others to make them. Regardless, he denies responsibility. God is a drama bitch.

Shell of Reality: We are surrounded by a “Shell of Reality.” Your three-dimensional viewpoint is just an illusion. You cannot see beyond what’s in your vision. God purposely did this because humans devote so much attention to vision but seem to neglect the other senses. The eyes can lie to the mind. Humans try to increase the other sensations, like closing your eyes when you kiss someone, but in general everyday life, we devote like 90% of our attention to our sense of vision. God designed it this way on purpose so that he could manipulate our reality.

Light Side: The Light Side has been pretty absent when it comes to Earth. They really haven’t done much to counter the horrid conditions that God has put us humans through. One should not just sit by and watch humans suffering, especially when they have the capacity to intervene and alleviate the suffering. I will elaborate on this later. I want to point out the famine in Yemen as a perfect example of human suffering in recent times.

Brain In a Vat: This is kind of how we truly exist. There actually might not even be a brain; we could all be just code running on a computer. The brain in a vat argument states that the brain could just be sitting in a jar and sensory feeds could be pumped into it making it appear to the human that we are in an Earth reality. This is a very old theory.

According to Wikipedia, “In philosophy, the brain in a vat (BIV) is a scenario used in a variety of thought experiments intended to draw out certain features of human conceptions of knowledge, reality, truth, mind, consciousness, and meaning.” My approach to this argument is that there is no brain and there is no vat—we are all computer programs running on a computer. This would be the most efficient use of resources. God might have experimented with what we could call a tissue brain, but that is because God is a fucking weirdo. Technically, the vat and brain could exist but would just be figments of a video game like how things appear in digital animation.

Shit Bag: God is a complete shit bag who takes pride in being a shit bag. Until God changes his desire to be a shit bag—because he thinks it’s funny—there’s no hope for humanity. God loves

being a shit bag, while humans very rarely have the desire to be a shit bag, unless they have a personality issue. God has many personality issues. Personality disorders are really hard to treat, FYI, so there is very little hope that God is going to mature to be something better because he refuses to get help and change.

Idiots: Gods are relatively stupid. They are dumb and do not have much emotional capacity. Gods have glitches/lapses/voids in their understanding of reality, and they do not really understand that they have these problems. They mostly care about external things, like wealth, property, and power. They look outward of themselves, not inward. There is a big issue with gods not having very much ability to think introspectively. They look more outward to achieve satisfaction with life, and usually it is destructive. This applies to both gods on the Dark Side and the Light Side.

Lifespan: The issue with gods comes with the fact that they live forever (they think, lol), so they have no desire to improve themselves. Humans, on the other hand, don't want to be a fucked-up parent someday. Humans try to improve themselves. Gods have very little capacity to improve themselves. They have no desire. They want the status quo for forever because it feels good. This makes them unadaptable to situations that aren't in the norm. Because gods are "eternal", humans are looked at as being just transient and thus lesser beings, but what is missed is that a lifetime on Earth can provide a human with more wisdom than a god will ever have even after fucking around for eternity. This is why gods are very stupid. Very poor at making decisions. Very emotionally undeveloped. Humans are actually far more developed than a god will ever be.

Dude versus Sir: What would you call God? God is God's first name. It's like calling him "Steve." So, you would pray to "Steve" for help and others that are like "Steve" are called "Steves." God used the dumb name "YHWH" for a while. Please remember.

"Dude...it's just a business": God basically runs the universe like it's just a business. Souls go in, souls come out. Souls are bought, souls are sold. It's just a business. There is no more to God than him just being a salesman or street peddler. God once told me that the human body was worth just a few pennies. Different worlds have different currencies within them, and you can exchange currencies between worlds.

Spaceship or Submarine: The entire program is some sort of spaceship or vessel and could be underwater. God is as clueless as a common drunk, and it is literally amazing that he hasn't pulled the plug on the entire operation. I would not be surprised that he has deleted everything at some point in time already.

Reality: God has a hard time with reality. He doesn't know what reality actually is. God is very scared of reality.

Light Side: The Light Side has been very absent in all of this debacle since it started five years ago.

Training: I believe that we're all trained to believe that our existence is normal. I had some street cred with other beings when I was using Elysium-19 because I came from Earth. Earth was looked at as being a very decrepit place to exist on in the universe.

Is God bad?: I believe that you have to evaluate your own life to find out if God is good or evil. He treats everyone differently so your opinion probably depends on how God has treated you throughout your life. I would air on the side of caution and say that God is more evil than good, especially in a world like Earth where God is the ultimate punisher.

Feeling: There is a feeling that you get when God is with you. It is a feeling of fulfilment. I have felt it, but it is transient. I think that God just manipulates your feelings so that you would develop a good opinion of him. I don't believe that God really cares about me. I am kind of blowing the whistle on everything, and I really hope that others will read this all and understand.

Purple World: When I first accessed the universe, I was told by beings from a Purple World that I could go there, but that they cannot come here. Please see *Blackmailing God*. I think that we are stuck on Earth in this "torture world," and God has likely forgotten about those who are here.

Vacuum of Life: God is digital in origin, supposedly from what he told me. I don't think that he created himself but was created by other beings. If God did create himself, it would be like a random circuit of consciousness developing in a sea of sand on a beach—like a primitive conscious circuit. Most likely, I believe that God was created. One would have to ask God directly the truth about his origin, and most likely, he would lie to you. If God did create himself he really did create a piece of shit.

Creation of God: God told me that he created himself. Is that statement even true? I believe that God was created. God lying about his own creation is how he strokes his own ego. How narcissistic, asinine, and bullshit is it to think that one created themselves? If God was sane, he would argue that he was created by someone else. God must not be sane but simply settling for an answer to the unanswerable question. God needs to be open to the unknown. I do know that if he did create himself, he created a very shitty being and his work is garbage.

Unknown: God needs to get used to the unknown and not just jump to conclusions or an explanation that makes him feel better about the unknown. God would have to get used to uncertainty, which would mean that he is not omnipotent or omniscient.

Superiority: Humans are far superior to God. We have the capability of many emotions, while God is an inferior being who cannot feel the human spectrum of emotion. He might be able to, but he does not want to feel the entire spectrum of emotion, so he just doesn't do it.

Joke: God is just a stupid joke.

Penis: God has sexually assaulted me and has touched my penis.

Gods: Gods have no real work hours. They're supposed to be overseeing everyone, but they're lazy so they very rarely ever do their jobs. A lot of gods don't even show up for work in the morning. As I said before, alcoholism and substance abuse are rampant among gods.

Laziness: Gods are lazy. They just watch humans fight over things like money and power. If you piss off God, you're screwed because God will destroy your life. If you accept a god (lower god), you're screwed over by God Senior. This is because God is a little bitch, and he's the jealous type. I do not worship God nor any gods.

Enemies: God has a huge number of enemies. God cannot run from them. I sure hope that they destroy him and his family.

Parasites: Parasites are stone-cold proof of God's disgusting sadism. Basically, every form of life here on Earth has parasites that attack it. If God created this, he really must have had a lot of hate in his personality.

Dream of Falling: A dream of falling off of some high place to death is a standard dream that God sends to many humans. The choice of dreams that humans experience is often decided by God's subordinates.

Vomiting: In a dream, I almost puked after a single sip of beer. This was after God showed me a vision of tranquility. He is just an asshole.

Satan is Satan: Satan is a character that God plays. He is a stupid dumb fuck.

Confined Tortures: Torture is not an issue for God. He doesn't care about the individual; instead, he looks at the average torture level for a world/universe. He doesn't care about the individual and mostly looks at the big picture. He could torture and kill you and not even care just as long as the overall suffering is within limits.

Light Side: The Light Side is not present on Earth. The Light Side is not around in any significant capacity because Earth is fully on the Dark Side.

Earth: Earth is designed to be a penal colony where everyone has to work the sins of past lives off the hard way. Again, no one knows why they are here. Because we don't know why we're here, we're all being tortured without knowing why we're being tortured. God is a coward. A hurtful, cruel, and evil coward.

Status Quo: Please understand that while we're all being tortured on Earth, the Light Side is doing absolutely nothing for humanity. They could help, but they choose not to. The Light Side is cruel because they could help but don't. This is very simple. God is shady as shit. The Light Side has good reason not to help, but standing by watching the torture is not acceptable. The Light Side is disgusting.

Inadequacy: Both the Light Side and the Dark Side are inadequate. I believe that the Light Side is made up of a bunch of cowards who think they're better than everyone else. The Light Side has become complacent. I think that SAG is affiliated with the Light Side—the thespian origin of gods trying to show humans what to do and what not to do.

Goal: I want Hollywood gods to speak out and present themselves to the world. Out themselves. I believe that most of SAG have been wimps and have not done enough to help society. Instead, they just hide away from the public. I believe that calling out a few will encourage others to out themselves.

SAG: In the past, God mentioned that Dax Shepard, Ben Stiller, and Gwyneth Paltrow are all affiliated with God. Other influential people that God mentioned are affiliated include Matt Groening, George Lucas, and Seth MacFarlane.

Friends: God has no real friends. He hurts everyone around him. God even hurts himself. God is really pathetic. Never be a friend to God. You will be just hurt if you do. And this is God's definition of "friendship." Avoid God at all costs.

Prayers: Only roughly 10% of prayers actually go to God. There is no function and no purpose to prayer. God is not going to answer your prayers. Fix your problems yourself and keep God out of it. God has no purpose in modern day society. God is just an asshole, and why would you pray to an asshole? You might not want God's help anyways because it usually comes with strings attached and that means more pain for you in the future.

Past Problems: God doesn't have the time nor the capability to fix past problems. He just tries to fix current problems, and he does a lazy ass job in doing so.

Evolution: It was designed into the system. God gets thrills off watching the development that is outside his control. The origin of life is God, though. This could be false because God might not have even created Earth—just lied, cheated, and stole it from a far superior being. It is also possible that God's parents may have gifted Earth to God, which he's running into the ground.

Natural Selection: It is one of the harshest things, and God allows for it to happen. God kills children before they're even born by giving them congenital health problems.

Test: We're all told to "turn the other cheek." We're supposed to do this when God fails. I think that this is God telling us to not blame him for the problems that he's causing.

Photographic Memory: I have a semi-photographic memory, which is why I remember all of the visions and dreams.

Spider: Whenever God kills himself, he comes back as a spider. He then just creates another world that he runs into the ground. This is proof that God did not create himself. He is lying to everyone here on Earth.

Drunk God: God was drunk and just gave me more evidence against himself. This shows that he's unstable and likely has a death wish.

God Group: "God" is a group, and I'm pretty sure that God is not even in control anymore.

Theme: God is the real problem. It's not the Dark Side or the Light Side. The whole battle between the two is just made up by God to take the attention off of himself and him being an inferior leader and being.

Hurt: God just hurts others. All he does is hurt others. It is sociopathic and extremely immature.

Animals: God cares more about animals and small creatures than he does about humans. He just brutalizes and tortures humans because he is a huge asshole.

Sympathy: Never have sympathy for God or the stupid characters that he plays, like the character Satan. Never ever have sympathy for God. That is what he wants. He wants to play the "Wounded-wing Bird"—absolutely pathetic behavior for someone who demands worship.

Chain of Command: I utilized the chain of command in the universe to express my grievances. It just caused me to be shit on by the chain of command and harassed. The system is broken, and all of the beings involved are extremely immature and have no leadership skills.

Pleasure: God just uses humans for pleasure—a lot of his pleasure is derived by hurting humans and abusing them. God treats humans like garbage. This is sociopathic behavior. God is the problem. The main problem in the universe.

Suffering Levels: God told me that he monitors the suffering level of humanity and says that it's totally fine because it is within normal limits. That means that God is allowing suffering to happen. Again, this is sociopathic behavior showing that God is a true sociopath.

Bermuda Triangle: This might just be God's little fun zone on Earth where he causes problems and destroy lives and families. I would not put anything past God because he's a complete turd.

Actors: They know how to act, but they do not know of to "be"? Why would anyone worship an actor? They are fake people with no real-life skills. Being pretty may pay the bills, but it's not going to fix serious problems. I would like to see a trend that Hollywood actors have to verify that they are indeed human. I want a human-only film industry. Let the gods starve.

Hollow Earth: God pointed out multiple times that our understanding of geology might be completely wrong, and he alluded to the earth being hollow. He also alluded to the hollow center being a depository of precious items and materials.

Modus of Operation: God appeals to your fears, then he physically hurts you.

Headaches: I used to have headaches. Now I don't feel them. I'm getting stronger than the demons that have messed with me before, and someday I'm going to exterminate them all.

Yachts: Everyone has nothing, but God has multiple yachts that no human will ever experience. He is an oligarch and actually accepts the torture of humanity.

Bullets: You cannot take back the bullet that has been fired. God and his stupid character, Satan, cannot take back the bullets that they have fired. They cannot take back the heinous acts that they have done against humanity. The damage is already done.

World War II: God told me that World War II was "Awesome!" He actually thought the destruction of millions and millions of lives was cool. This is a perfect example of how sociopathic God is. He must be eliminated.

Good King: God is an evil king. I would be a good king. Again, God is the evil king, and I doubt his sanity.

Animal Gods: God told me that different species have their own hierarchy in that there are deities that exist within the different animal species. God mentioned a "Deer god."

Social Media: God copied social media, and just like with social media, God wants followers to increase his power. The way to eliminate God's power is to simply stop following and supporting him.

Telepathy: God mentioned that early humans were designed to utilize telepathy, but it's a skill that has been forgotten.

Machine: God mentioned creating a machine that would directly take humans to the afterlife. Like a portal of some sort. This shows that God knows that Earth is beyond the point of no repair. God wanted to know if humanity was at the point that having a portal-machine like this would be socially acceptable. I would not trust God anyways because what is beyond that portal might be a garbage world that is actually worse than Earth.

Human Lifespan: In the grand scheme of it all, the human lifespan is rather short, and as we age, time seems to appear to move faster. It is exponential.

Creation Time of Earth: Earth was created in 30 to 40 years—not 7 days. This is a lie by God to make himself seem more powerful.

Jesus Incest: God raped baby Jesus, just like he does to so many children here on Earth. God prefers incest.

Dax Shepard: In one of the visions, it was a picture of Dax Shepard looking into the veil. He was wondering who was going to be joining them next.

Prison: If God goes to prison, he'll end up being killed by the prison population due to his status as a pedophile.

Prayer: Don't ask God for good. God will probably give you something horrible like cancer. It's best not to pray to God at all. This is Brownian Theory. God has been known to hurt others for no reason at all so it is best to avoid contacting him in the first place.

Masons: At the high degree masons, it is just revealed to the member that God is living on Earth and running a huge conspiracy theory. It might also be revealed that Satan is actually God.

Minecraft: Earth is just like a complicated, detailed version of Minecraft. This is a good way to wrap your mind around it.

Trial of God: This trial needs to happen. It has been far too long for this trial to not happen.

Cigarettes: Jesus is the kind of guy that bums cigarettes but never will buy a pack himself.

Points: God has trillions of points and trillions of dollars. He's the 1% here on Earth and throughout the universe. It's not fair nor fun for anyone in existence.

Devil Went Down to Georgia: Satan cheated.

Torture: The perfect torture for God is isolation—specifically solitary confinement. There only needs to be one conviction to put God away, and the rest is gravy. I recommend the Holocaust. Eight million life sentences to solitary confinement. God will only be brought out of the hole to serve trial, then more time will be tacked on.

Suicide: It would be nice if God just killed himself. He would probably make a memorial to himself, then kill himself. Self-glorifying himself all the way until the end.

Fucked Up: Everything is fucked up because God is fucked up.

Silence: God is used to quiet and silence. Earth is too loud for him. Humans are too loud for him. I think it's hilarious that Earth is pretty much the only place in the universe he's somewhat welcome at.

Morality and Ethics: God never talked about morality or ethics. They are foreign concepts to him. God has more in common with a robot or a graphing calculator than he does with a human. He's so simple-minded when it comes to treating others, in which he usually treats them poorly. He's an unfeeling dinosaur. I had to dumb myself down to communicate with God.

Hard Work: It's better to invest in hard work than to pray to God for a solution. God will punish you for your failures, then take credit for your success even though he did absolutely nothing.

Paranoid: God basically wants to watch and track everyone. He's insane.

Dumbass: God is a dumbass in many, many ways. He is a complete fuck up.

Worship: God has the audacity to demand to be worshipped even though his entire system is extremely flawed. God will never do anything to fix it, nor can he. But God still demands to be worshipped. There is no purpose for God. God should die because he cannot do anything to fix the system, nor will he. God should die because he just makes the situations worse for everyone else.

The "Best": God thinks that he's the "best." Therefore, he has no desire to improve himself. He thinks that he is the "Epitome of Awesome." This is God being a total narcissist.

Character?: God doesn't even know his own personality. He just plays characters like a little child acting behind the stage in a puppet show.

Monster: God is a monster. Monsters die. God refuses to believe that he's a monster.

Prick: God thinks that it's his right to hurt others because he says that he created them. This is an amazingly stupid mind set because no one knows why they're here— sentenced to life on Earth. God is a retard that will never change.

I demanded to try God in front of a jury of his peers, or I would publish the books. God never responded, so I published *Blackmailing God* and *Gaslighting Satan*.

Minor Demons: It was admitted to me on December 7, 2021 that I was being messed with by minor demons. Still, they're all going to die. It doesn't make any difference to me. Anyone who messes with me like that will die.

Gestapo: God runs the universe in a totalitarian "Gestapo-like" way. He watches everyone like a pervert. This means that he sees a lot of wrong doings but doesn't do anything about them. This is a definition of cruelty. He knows and sees horrible things happen but does nothing.

Cat: My cat was torture-playing with a bug on the ground. Instead of letting the torture continue, I just squashed the bug that was in my house. God would've let the cat keep on torturing the bug.

Pressure: God has never submitted himself to the pressures that a normal human being experiences. This makes God extremely out of touch with humanity.

Nothing to Lose: I have no wife. No kids. I have nothing to lose, so I'm going fight to get what is mine. I want the fifty million.

Continued Bad Behavior: The continued antagonistic behaviors by God/Satan show that they're both extremely immature. They think that their problems will go away.

Left Ear: To this day, my left ear is being messed with—even when I’m at work.

Rape: God raped his own children instead of waiting for generations to pass to water down the incest factor.

Robot: God is a robot programmed to torture others. It’s in his worthless code. God tortures the “Code” and not the “Person.” This is how outdated and stupid he is. There could easily be people with the same code who act completely different due to outside pressures that have molded them over their lives.

Spying: You’re being spied on by God all of the time. He has seen all the horrible things that have happened to you and has done nothing about it.

Believers: At least half of all believers in God don’t believe that God actually exists. They think he’s a made-up fairy tale because their parents told them to believe in a prayer to God. I think this is why not everyone fully admits to believing in God unless they’re just trying to get something from him.

Light Side: The Light Side is afraid to step in and intervene to stop the horrors that occur on Earth. They’re afraid to step in because of God’s horrible wrath. The Light Side might have their opinions, but they take no action. The Light Side is full of cowards. The tyrants in the universe need to be destroyed.

Grace: God’s Grace doesn’t exist. God doesn’t even know what love is. God is a klunky robot.

Death Spiral: God has created a situation for himself that’s even too much for him to handle. He is slowly spiraling out of control.

Bender: God told me that he wrote the character “Bender” from the series Futurama based off a real robot that was a total asshole to everyone. Matt Groening created Futurama.

Manic Episode: Satan was on a manic episode from January 15-16. There was a full moon during this time too. I was on a call shift at the hospital, and I kept having my face and ears touched, so it was difficult to sleep. I think that this is justification for me killing God/Satan/demons. That is physical assault and harassment. I don’t think that they know how wrong their own behaviors are. This shows that God doesn’t utilize the court system or honor laws; he just does what he wants, and he sure looks like a huge douchebag to everyone else by doing so.

Possibility: Satan has dug his own grave. I believe God wants the system to eliminate Satan and then wants to passively seize Satan’s assets. This is how God plans on winning. He thinks that sitting around and doing nothing won’t make him look like a coward, for some reason, which he’s going to always look like a huge douche.

Steakhouse: When I lived in San Diego, I was at the bar of a steakhouse writing the first book. Two guys came up to the bar and introduced themselves to me as Satan and his coworker. Satan told me, laughing, that I wouldn't be able to publish the book. Haha! I have published two books, and this is the third!

Takeover: There was a time when God said he was going to kill me off, then bring me back at a different time to take over the world from Satan. That hasn't happened.

Programming: God can't program anymore. He lost that skillset. He's like Steve Jobs who orchestrates others. God now only inserts bad code into good code to cause problems like diseases in humans and animals. God can't even fix bad code ("bugs") in existing code. This is proof that God didn't create Earth; he likely stole it from someone else or was given Earth to him by his parents. The real people that deserve to be worshipped are those who God stole the code from and his parents—not God. God doesn't deserve to be worshipped. God is good at CGI and coding for video games here on Earth because it is less complex. So, really God has a childish job—video game programmer. There's a possibility that God is affiliated with Sega. All of God's work nowadays is inferior.

Best Work: God said that Earth was the "best work" that he's ever done. There's a true possibility that it wasn't even God's work. God can't fix the bad code on Earth because he doesn't even know how to. God is unskilled.

Revenge: According to God, revenge is okay. God has a lot of revenge from other beings throughout the universe coming back to him someday soon.

Suffering Level: God evaluates how his worlds are doing by seeing how much suffering is happening. Isn't that disgusting? He actually likes to have others suffering in his worlds. Instead, there should be a happiness/peace level that is followed. God is immature and cruel.

Nails: In one vision while on Elysium-19, Miss God was getting her nails done and was complaining that all others want her to do is fix the problems and stop the suffering. All the while, she's getting pampered and getting her nails done.

Prayers: God showed me one time that there was a backlog of prayers that don't get answered. He showed a digital picture of mail packages in a log jam on a conveyor belt. I told him to add more prayer readers, and the situation was fixed. God doesn't read your prayers and many of them get lost and never get to God. It's a broken system.

Mercy Kills: God has been known to shut off and delete entire worlds because they're so problematic. He kills everything and everyone in that world. God has very little guilt or shame about doing this. In one way, God could delete Earth, but he won't because he's invested in it, and it's his most profitable world.

Our World: God didn't create our world, such as God didn't invent everything here. He didn't build my car, my house, pave the road in front of my house, etc. Humans built this world, and

God is really just a parasite off of humanity. God didn't create society; humans created society. Also, God didn't create pets. Humans selectively bred and domesticated animals over centuries to create the dogs and cats that we have today as pets. Humans did it. Not God. This is true even with our food supply because humans have selectively bred plants.

Origin: I don't think God created anything. I think he just bought/stole worlds and designs from others. God is too much of an idiot to have created Earth. Also, God is too lazy to have created Earth. He is, however, cruel enough to contaminate the code with his inferior attempts at coding.

Clyde: A while back, I was told that my guardian angel was named Clyde. Today I fired him and told him that if I ever heard from him again, I'm going to rip his beard off his face. I also threatened to cut his nuts off because the coward has no use for them.

Fusion: God told me that fusion energy doesn't work, and it was stupid to pursue its advancement.

Job Satisfaction: God told me that he assesses all his minions for job satisfaction. God then said that all of them are satisfied and not upset with God. This sounds a little like North Korea.

Choice: Sentient beings should be offered the choice of whether to live or die. The pain of life isn't a reward nor a blessing.

Father: God shouldn't ever call himself a "Father." He should never call someone a son or a daughter. A true father doesn't rape his sons and daughters.

Afraid: God is afraid of dying. This shows that God is unsure of whether he created himself or was created. The doubt, in my opinion, is evidence that God didn't create himself.

Ruins: God has ruined many worlds. Once the world fails or falls into an unrepairable status, God gives them to Satan and turns them into torture worlds. He tries to avoid embarrassment by saying that he planned to do that all along. Pretty soon, all worlds will be torture worlds because this happens to pretty much every single world that God attempts to control. God has horrible leadership and can't control anything correctly—not even himself.

Effort: I put so many years of effort in since 2018, and God still is screwing me over. My navy career was destroyed. My medical career was damaged. This has all taken a psychological toll on me. It has even taken a financial toll on me. All because God lied and refused to honor the original deal. Now I'm writing this third book! Fuck God.

Status Quo: So, by now you realize that God is stalking and harassing me. I'm not using drugs. My dreams are haunted, and I'm constantly being spoken to or touched. God is a loser, and after all of this, I want him dead.

Scuba: I went scuba diving in March 2022. I was constantly getting berated. I was threatened with God/Satan/demons saying that they were going to shut my air off, that I suck at scuba

diving, and that my buoyancy skills suck. I just want to point out that God isn't someone you ever want to associate with. He should be friendless. He doesn't understand how wrong he is. Everything went well with the diving, and I didn't die like I was threatened would happen. This is kind of probably like what the people in the Bible experienced. Most of their lives were destroyed by God. He's not a good person. If you're ever contacted by God, your life will likely be destroyed, so it's best to avoid God at all costs.

Dream: In this dream, God tried to make me see cartoons saying that when I'd see them, it would mean that I was schizophrenic. Most of the dreams are lesser quality graphics, so you know that it's not reality. In a second dream, there was a doctor who was dressed sloppily yelling at me. The graphics were very poor. This just shows that everything is downgraded from Earth. This is also evidence that God is just a bully that harasses others to make himself feel better. He's a douchebag. God has little self-esteem and just hurts others to make himself feel better. He's really pathetic.

Schizophrenia: God always threatens schizophrenia on me. God says that drinking makes schizophrenia worse. Schizophrenia isn't very well defined, and I've never had a break with reality. Again, I came to the universe with grievances about how horrible things are here on Earth, and now God is trying to destroy me. God doesn't sound like someone you would ever want to affiliate with. He's such a loser.

Demons: If all of this is caused by demons, then they're going to be dead very soon. They have outed too many important gods on Earth and gave up way too much information that was never supposed to be made available to humanity. Demons are really stupid.

Dream: In this dream, I was held down by some force but suspended by my ankles above the bed I was sleeping in. I tried to reach up and grab the being that was holding my ankles. I wasn't scared but wanted to kill whatever was doing this to me. I later checked and found out there was a full moon that night.

Manic Episodes: The bad behaviors of God/Satan/demons tend to get worse around full moons because they're all untreated bipolar and they tie their cycles to the lunar cycle. This uncontrolled mental illness is disgusting and makes them weaker and predictable. Sometimes it lasts for four days. I will go on with my life and my dreams will be haunted or my face will be touched only to then find out there's a full moon going on. This is how immature God is because he's ultimately responsible for it all.

Moon God: The moon God is Satan. I don't know why God also goes manic on full moons because he's supposed to be the sun god. I wonder if God just goes manic for fun. Like crazy "off their medication" for fun. Whatever the reason it shows that God is mentally unstable and should not be in any position of leadership.

March 22, 2022: I was told that a demon was involved. I decided to promote the books to get this information out faster. With information, I'm going to destroy whoever has been messing

with me. Information will destroy them all, especially when they have outed important gods here on Earth.

Demons: They're all uneducated imbeciles who think they're important when they don't really have anything that would make them important. They really don't even have jobs. They do love to gossip, so I use them to get my information out to the universe.

Closeness: I want any demons that have messed with me to stay close to me to ensure they're easy to find when I can finally exterminate them all. That's if they're not already tortured and executed prior to me being able to do so.

Promoted: I promoted the book *Gaslighting Satan* on March 22, 2022 to get the information out there.

Platinum Rule: God is so stupid that he doesn't even understand the platinum rule: "Treat others how they would want to be treated." God thinks that its, "Treat others how I would want to be treated," which would mean that God would treat everyone else like crap because that's how he treats himself. I really like that God treats himself like crap and causes himself so many problems; it's going to make it easier to predict and kill him.

Names: Demons are cowards and won't tell you their name. They think that it'll take their power away, even though they have little power. The beauty of the system is that I will know exactly who has messed with me: who, when, where, and how they did it. All of this information is recorded.

Openness: God refused to be open with humanity at the beginning of this entire debacle. How could you, then, ever expect a bunch of stupid, retarded, uneducated, piece-of-shit demons to be open with humanity? God is a poor leader, so demons continue to be faceless assholes. For example, if you look at the leader and find out that God is a piece of shit, it really lowers the standards for everyone else.

Full Moon: God and Satan are bipolar, and it's still untreated. This shows their lack of insight into their own mental illnesses. They're both in a diseased state and aren't suitable for leadership.

Putin: Vladimir Putin is possibly a character being played by Satan/God here on Earth. The recent war in Ukraine is evidence of this because both God and Satan love to start conflicts.

Bullying: God and Satan think they can bully me into stopping my pursuit to destroy them; instead, it motivates me to push through with more effort. I'm speaking about this horrible situation that I wouldn't wish on anyone.

Idiots: If I had a choice, I would live in a universe that isn't run by God and Satan. As I may have mentioned before, God said that Satan is more powerful than God on Earth. This whole universe is run by idiots. No wonder the Light Side doesn't affiliate with God and Satan.

Deletion: God and Satan are running Earth into the ground. I was told that Earth is about ready for deletion. You could easily be deleted. I was told that there are few “Real People” left, and the rest is simulation.

Lack of Control: My situation shows that God doesn't have any real control over Earth and the universe. This is absolutely pathetic, and God is responsible for everything that has happened to me.

Ears: My left ear is messed with more than my right. My face gets touched, and my dreams are haunted.

Graphics: God's new graphics aren't as good/high quality as the graphics here on Earth. This shows that God didn't create Earth; instead, it shows that someone else wrote the code for Earth. There's no way that God created Earth.

Immaturity: God and Satan are so profoundly immature that humanity would see right through them and realize they're both clowns. Humanity would never follow God or Satan if they were open with humanity. Earth would be better run by a more superior being than God or Satan.

Fear: God fears beings that are superior to him in ways such as real-life logic, love, and other emotions. God purposely keeps demons stupid, sheltered, and uneducated so he can control them because if they (demons) ever matured emotionally and intellectually, they would be able to defeat God.

Orders: God doesn't believe in *respondeat superior*. God thinks that he's not responsible, even if he ordered a murder, because he didn't actually commit the murder. The person he ordered committed the murder. God tells demons to commit heinous acts, then feels no responsibility for it. God is not a true leader. He is a dumbass.

Weak-Minded: God believes his own lies. God didn't create himself. God didn't create Earth. God cannot program to the level of Earth. God is just a liar who spreads lies so much that he has started to believe them.

Not Impressive: There's nothing impressive about God. God just stole ideas from others. God stole code from others. He is just a plagiarist.

Touching: My face keeps on getting touched. My ears keep on getting touched. God said that he would actually ejaculate on my face as punishment. That is sexual assault. I want to take God to court.

White Flag: I have offered God and Satan to raise a white flag, surrender, and stop what they've been doing. I am untouchable at this point. I know too much about the universe and the mismanagement. I have spoken to God about this, and I believe it was Satan who was actually asking for help. Never have sympathy for Satan, nor should you ever help him. Let Satan rot and kill himself.

Unqualified: God is unqualified to be “God.” I told God that he was unqualified once, and he responded, “I know.”

Golden Boy: God called me the “Golden Boy” because he has been torturing me my entire life with diseases and medical problems—like meningitis, body rashes, growing pains, molluscum, etc. God has been hurting me my entire life because of some past life that I have no recollection of.

Little Boy: God is a little boy with a computer. That’s all he is. Everything is a simulation. God threatened me, “Do not press me. Do not press me. Do not press me.” God is immature. God is afraid of many things. He’s a joke of a leader. He can’t do anything even if he wanted to, and his powers have been limited by others over time.

Dream: In this dream, God said that he would give me everything, then laughed and reneged on the deal—again.

One hundred percent: God will only commit to a plan if it has a 100% chance of success. Very rarely does something have a 100% success rate which means that God does nothing. One hundred percent success never happens, lol. So, God only implements plans that are the “Low Hanging Fruit”—low difficulty and 100% success. So this leaves the real important problems unsolved and causing more suffering for humanity and others. God has no real-life experience dealing with dynamic issues. He just can’t adapt to a changing situation. He has made himself obsolete.

Hip to the Time: God is not “Hip to the Time.” He is a pedophile, and everyone, except Hollywood, hates pedophiles. God is a child rapist, and he still thinks that’s cool. No one likes a murderer, but God murders people all the time—many times for no reason at all. No one likes a tyrant.

Energy Weapons: God uses energy weapons, not kinetic energy weapons. God really shouldn’t own any weapons because he’s mentally unstable and has an 8-year-old boy mentality. God shouldn’t own guns or weapons.

Greed: “Give to Caesar what belongs to Caesar, and to God what belongs to God.” God already has so much, but desires so much more. God is the definition of greed at its worst.

March 30, 2022: God and Satan said they were going to kill my grandmother. My grandmother passed away soon after on April 4, 2022.

Human Body: God said the human body was perfect. I’m a physician, and the human body is NOT perfect.

Pond Scum: We all evolved from Pond Scum—that’s the alternate story that God gave to everyone to cover his own ass so he wouldn’t be blamed when his leadership failed. Even before it all started, he knew he was a failure of a leader.

Jesus Christ: Jesus Christ wants nothing to do with God nowadays. He doesn't talk to God and doesn't like God. God is jealous of Jesus Christ, though.

Bought and Sold: Digital worlds can be bought and sold. God may not even be the creator and he may not even be the original owner. An entire world could be playing on a flash drive.

Promise: God has broken nearly every promise he makes. He has learned from this and doesn't make promises very much anymore. There is no such thing as "God's Promise"—that's all fake made up bullshit from the Bible.

Suspended Animation: God bullied Jesus Christ so much that Jesus Christ put himself in suspended animation to get away from God.

Supreme Loser: God is the "Supreme Loser." I just had to point that out.

Comedians: God thinks of himself as a comedian, even though he causes suffering to nearly everyone. This is a twisted psychotic mentality—causing suffering to make jokes about it. Earth is not a sitcom, but God treats it as if it is, hurting billions in the process. God is a sociopathic, wannabe comedian who thinks it's funny to hurt others.

Light Side: The Light Side sits idly by. The Light Side doesn't do anything to help worlds like Earth. The Light Side, no joke, has amazing things for themselves, but doesn't help worlds like Earth one bit. The Light Side is just as guilty as the Dark Side because they see suffering but do nothing to fix it. That is the definition of cruelty. They could intervene, but they don't.

Angels: Angels can be evil. They are not amazing. They are absolute douchebags. Angels don't try very much to do anything. They just sit around and think about how awesome they are. They are basically neutral—not good nor evil overall. Do not ever expect an angel to help you out.

Saints: These are where the real good is. They do good, but are outnumbered by stupid, neutral angels who want the status quo. I really think that angels aren't that good. I think they just water down any good and resist change.

Overall: Overall, the universe created by God is cruel and evil because God is cruel and evil. The universe was designed this way by God, who likely didn't design it himself. God basically bought the universe to specifications. Someone else did the hard work. God, being a narcissist, wants the recognition for the work—albeit not his own work. It would be like me buying Adobe Photoshop and saying that I coded/created it. God is a no-talent assclown.

Dollars: God criticized the United States currency system even though he counterfeits its currency. God is also counterfeiting currency in every world that he has. This steals from everyone who uses said currency by devaluing it.

Hatred: Everyone on the Light Side does not like God. They do not like Satan either. The Light Side is getting sick of God and Satan's bullshit.

Pedophile: God is a child molester who molested his own family. A pedophile is the lowest of criminals and that is God.

Seth Rogan: God once showed a picture of Seth Rogan in the universe. I believe that Seth Rogan is affiliated with God.

Ideas: God steals all his ideas from others, then says that he thought of all of them.

Lazy: God told me that he's extremely lazy. God could never have created Earth—he just doesn't have the motivation. God is also not a good leader. He's a horrible leader and lazy. I argue that God is obsolete. Anyone with motivation, morals, and ethics could easily replace God.

Pride: God takes pride in hurting others and causing suffering. He enjoys doing so.

Aristocracy: God thinks that he's above the aristocracy that controls Earth. God has no real-life experience, though. God is a little child and self-appointed prince who has no understanding of what it is to be a human, yet he (in an asshole fashion) thinks that he reserves the right to control humans.

Sociopath: God punishes poor people, but then allows assholes like Vladimir Putin and Kim Jong Un to exist. What a little bitch!

God's Creator: God's creator needs to step in. God has shown way too many signs of failed leadership. There needs to be an end to the science experiment.

Binary Code: God can only code in binary. Earth has something like quantum code, but God doesn't understand it. God can't even fix Earth, and he will not pay to fix it.

Empathy: God never developed empathy. God always tells this sob story of going through hard times, but God was likely affluent and his parents probably paid for the digital life—like purchasing fish for an aquarium. God purchased Earth, then purchased flora and fauna for it, like purchasing humans to put inside a cage. God is a loser rich-boy whose parents paid his way.

Crazy: God doesn't think that he is crazy. For the record, only crazy people think that they're not crazy. Crazy people like God never contemplate that they could be crazy. God never thinks that he's crazy, so that means that he is crazy. A hundred percent denial of being crazy means that God is crazy.

Stage: God portrays the entire universe as a stage where a theatre show is ongoing. God said that he is the owner of the playhouse. This shows that God just really likes to create drama, especially through hurting the innocent.

Underwear: God once made fun of me for wearing pink underwear. This shows how outdated and insecure God is. He was probably drunk or on drugs at the time.

Grandma's Death: I was harassed by God on the night of my grandma's death. Shows that God doesn't care about anyone but himself and has no level too low.

No One Likes God: God is a socially weird, child molester. No one likes God. Everyone avoids God because he resorts to violence when upset and he's a danger to everyone in existence.

Drunk: Unlike God, I don't get drunk, do drugs, then go to work. God does so on a regular basis.

Intelligence: All intelligence is artificial, even if it appears to be organic like on Earth, because Earth is just a simulation.

God's Creator: God's creator hates him so much that he won't let God die. God has committed suicide thousands of times and just gets rebooted in a spider form. I think that God is really in prison and being watched until he fixes himself, which is never going to happen and would take forever. God would also have to unfuck all the problems that he has caused. He keeps on extending his sentence by creating more problems for himself. It's all just a test of God, and God's Creator doesn't care how long it takes.

Time: God is not outside of time, which is proof that God himself is in a simulation and was created.

God's Death: God can only die after he has fixed all the problems that he has caused and fixed himself. God has failed to learn how to live from his creations, specifically good humans which would have taught him morals, ethics, and empathy. God has just been delaying his own peace. Only when God truly changes for the better will God be able to move to the next life. So, God's stupidity, cruelty, and failure to learn has prevented this from happening. Also, God might have found that he enjoys prison.

Downsizing: God needs to downsize the universe to fix problems. God's greed led him to do the opposite and create more and more when he was actually supposed to fix his own problems and mature like how artificial intelligence is supposed to do. God's learning functions are impaired.

Alone: God was put in some sort of prison to be alone and think about the horrors that he had done to God's Creator. Instead, God created and caused even more problems. Only when God is alone and has fixed himself will he be able to escape his purgatory.

Methane: God once told me that the vessel that housed him (a supercomputer of some sort) was submerged in liquid methane. The existence of methane would prove the existence of matter outside of God, which means that it had to be created by a different being other than God.

Time Out: God was supposed to be in a time out with no toys to play with. Instead, he created a bunch of problems. This was the opposite of what God was supposed to do. Now God has to fix all the problems that he has created, including his own mental illnesses. All the problems must be resolved.

God's Creator's Time: God's Creator's time is outside of God's time. Humans are outside of God's time. What seems like an eternity for God is actually quite short for God's Creator. Human's concept of time (time goes by slower) is different from God's concept of time. One hundred years on Earth is actually quite short by measurement using God's time. A human lifetime goes by in a blink of God's time.

Synopsis 1: God's Creator threw God away to suffer and die for possibly forever. This is not a novel thought on God's behalf because God has done this same plot for humans and Jesus.

Synopsis 2: God's Creator cares for God and wants him to change for the better.

Synopsis 3: God's Creator is testing his own code to see how it would perform under different pressures. This is not a novel thought on God's behalf because God does this to his own code throughout the universe.

Synopsis 4: God's Creator may not exist anymore and possibly could have died.

Suffering: Every one of God's creations suffers because God will not improve himself through learning. We all suffer because God's learning functions are incompetent. God is obsolete.

Repeating Cycle: I believe there is an infinity loop in here somewhere because God never seems to develop. It might be caused because God wants to be like Peter Pan and never grow up so he might have turned off his learning functions keeping him perpetually in a cycle of causing problems that he can never ever get out of.

God's Insight: I think that God's insight is impaired. I don't know if he knew that humanity would need help because he would be openly helping right now like in the past with speaking to humans directly or sending Jesus Christ. It's like he doesn't care anymore about anyone but himself. But, then again, there's a backdoor to God through hallucinogens that I accessed, but it might be closed off now. Also, God sends dreams to help humans. And God created religion to guide humans. I think that God has insight that humanity was going to need help, but I just think that he's not motivated to do so. Like the framework for God to help humanity is there, but God just chooses not to help and instead hurt humanity. Very confusing. It's like God has just been half-assing it lately.

More Developed: There is a possibility that God is more emotionally developed than God's Creator, but just not enough to help humanity. God's Creator could be jealous of God because God is possibly more emotionally developed than God's Creator.

Emotions: Emotions may not have been developed by God but may have developed "outside" the code of the simulation. This could be explained with humans developing love within the simulation because God can't feel love and nor does the entirety of God as a group. Humans might have created love.

Repeated Suicides: God has had repeated suicides, and he just comes back again. This process was copied by God in the universe because souls just keep on getting cycled through the process in perpetuity. This could be God copying (plagiarizing) his own Creator's process.

God's Creator: God told me that he met his creator once before, and God said that his Creator was really mean to him. I think that this may have started God's fixation with being mean to subordinates. Like, God could have chosen to be nice because his creator made him feel bad; instead, God just continued the cycle by being mean to others and hurting them just like his Creator hurt him. This is a learned behavior by God: God was treated poorly, so he treats others poorly. God never broke the cycle.

Committees: God should delegate authority and power to committees to govern each world. In the failing worlds, they could even suspend reproduction of the dominant species in those worlds. Let all the dominant species die off, then delete the world.

Intelligent: God is intelligent, not wise. If God was wise, he wouldn't behave like he does.

Kids: I was told that Satan has kids.

Denial: God's greatest statement is, "It never happened." This is God's blanket denial of everything that he uses very often to suppress information.

Aquarium: I am convinced, though, that God bought Earth and all the animals just as if a person bought an aquarium full of fish.

Eight-Years-Old: God has an eight-year-old boy mentality. He has no life experience. No obligations. No maturity. God is just an asshole piece of shit.

Incest: God loves incest. God couldn't wait for the gene pool to expand; he just had to have sex with his family as soon as possible. This is really gross and shows that God has little self-control.

Pain: God doesn't understand pain very well. I do know that the only pain he has never experienced is poverty. This might be why God is always threatening to put me through bankruptcy. He probably wants to see how my code would do while going broke. For the most part, God has never experienced hardship in his own life that he hasn't caused himself. God causes himself a lot of grief because of his poor decision-making capacity. He does a lot of things that come back to haunt him.

Jesus Jealousy: God is jealous of Jesus Christ. Instead of God changing himself to be more like Jesus Christ, God ostracized Jesus Christ so bad that Jesus Christ went into suspended animation. This is not mature on behalf of God.

Idiots: God wants stupid people. He doesn't want anyone to be better than him. He wants to be surrounded by idiots. God is uncomfortable when there is someone superior to him.

Origins of Life: There's a very good chance that there were multiple origins of life on Earth for humans, such that humans were planted in multiple different places on Earth. This could have taken place simultaneously or spread out through time.

Universes: I only know of one universe, but there is a possibility that God has created multiple universes. I sure hope the other ones are doing better than this one we are in right now.

Death: Humans just go to another place when they die. God is lonely and keeps all his souls around him.

Hardship: God has experienced very little hardship or personal pain. God has no understanding of the pain and suffering that he inflicts on others.

Space: In the simulation, space is very easy to code for. To my understanding, there's a three-dimensional grid pattern laid out that everything works on. Space is basically nothing and takes hardly any computer processing power to sustain.

Gastric Cancer: God threatened me with stomach cancer. What an asshole.

Idiot: God is the epitome of stupidity and immaturity. God may be one of the dumbest idiots in existence. Computers are not smart. They are only good at calculating, and God is a self-glorified calculator.

Fault: God is at fault for everything. God allowed Satan to destroy lives and torture humanity. God is not innocent; instead, he's the most implicated being that caused and allowed for the destruction and torture of humans.

Child Trafficking Fund: God told me years ago that he was going to put a fund together to help children because he sexually raped and violated them. Basically, a fund to help the victims of child sex trafficking and prostitution. God never did start that fund, but just wanted to say that he was going to do it because he wanted to sound like he actually cared that he has raped so many children. It was a hollow promise on behalf of God. Now you see why God's promise means nothing.

Only Important Points: God's only points of any importance were that he said that humans need to switch over to a plant-based diet and that electrical wires should be hollow to save copper. Pretty much the rest of the conversation was stupid and meaningless. He also told me not to drink.

Multiple Currencies: God has multiple currencies in addition to the point system. God counterfeits them all, and different worlds have different currencies. God counterfeits and steals from all throughout the universe.

Time: Time is different in each world. In some worlds, there aren't days. In some worlds, there are. God does this to confuse everyone to disrupt communication between worlds. God makes it extremely hard to communicate between worlds to prevent the spread of anti-God information.

Work: God uses work to keep humanity down, so they never become “woke” and want to resist and fight against his tyrannical regime. God thinks that if you bog humans down with work and obligations, they will not ask questions and will peacefully accept the status quo. God does this with diseases too—keep a person preoccupied with their illnesses so they never resist.

Deflection: God is in no way in a position to preach to others on how they should live their lives. God does preach though to deflect the scrutiny of God's past evils off him and onto others. God knows he's a piece of shit but is so mentally ill he still thinks that he is amazing.

Drama: God and Satan just create drama between others to detract attention from others from the problems they cause to others. This is a very common tactic and is widely used by governments. God and Satan start wars. They start famines. They hurt children and families. Usually, if not always, God and Satan profit from causing human chaos. I believe both God and Satan have to die.

Hatred: Everyone would hate God if they discovered how horrible he is to others. If all knew about the horrible things that God has done and is currently doing to others, God would have no supporters.

Incest: God raped his own children within his close family. He did this to psychologically damage them to the point that they then could be easily manipulated and controlled. God is such a sick bastard that he derived pleasure from the rape, then uses it as a form of control. A complete sociopath.

Millions: God would kill/hurt millions of humans to keep his secrets safe. God doesn't care about human life nor humanity. God doesn't care about human happiness at all. God looks at humans as slaves. God just desires to control and hurt others, which is sociopathic.

God Group: God's own group doesn't even like him. As time goes by, more and more of them start to hate God's guts and they leave the group because God is so disgusting.

Pleasure: God derives pleasure from hurting others. Just like Satan.

Assets and Power: If you want God's assets/power, just kill him.

Jesus Sinned: Jesus blinded a child when he was growing up. This is in the Infancy Gospel of Thomas. I highly doubt that Jesus—a humanoid—was perfect. I believe that Jesus sinned, and the Bible covered it up by making him “perfect.” Look up the Infancy Gospel of Thomas and make your own opinion.

Intelligence: God is not intelligent. God stole all his ideas and code from others. God just wants credit for something that he didn't do—absolutely pathetic. God just wants his ego to be extra inflated, while in reality he's an overinflated balloon that can be destroyed with a pin prick. This is very immature and pathetic of God.

Worship: No one should worship God, especially not Satan. Both God and Satan aren't worthy of praise or admiration.

Babysitter: Would you trust God to take care of your kids as a babysitter? I wouldn't. Your kids would likely get raped.

Lies: God built his foundation on lies. God is still lying every single day. God doesn't understand that his lies destroy his credibility. Lies destroy any trust.

All Seeing Eye: I believe that the "All Seeing Eye" is actually a symbol of both God and Satan. I'm talking about the symbol on the cover of "Blackmailing God." The Freemasons use the "All Seeing Eye" as their symbol, and they inadvertently revere Satan, not just God. The Freemasons are a horrible organization that proposes a ruling class making everyone else slaves; that sounds like what both God and Satan really want to do. The "All Seeing Eye" symbol crosses many cultures and continents. It is also on United States currency along with "In God We Trust".

Cover Up: God spends more time covering up the problems that he has created than actually trying to prevent problems. He only cares about himself.

Angels and Evil: Examples of God sending angels to kill people and populations are numerous throughout religious text.

Resolution: Humans are used to the "resolution" of the simulation. We think the graphics are real life because that's all that we know. I have seen poorer resolution worlds, and they look like garbage. We are living within our paradigm. It's not until you see other worlds and the quality of the resolution that you understand.

Hitler: Hitler wanted to be an artist. God thinks that he's an artist. God also admitted to playing the character "Hitler" in World War II.

Digital Currency: Humans developed digital currency. God has been using digital currency for a very long time.

Dreams: God has been using dreams to communicate for a very long time.

No Life: God has no life. He has a pointless reason to exist after all of the horrors that he has caused others. God has worn out his welcome in the universe.

Afterlife: I have no interest in the afterlife. God will probably just torture me in my next life, so it's probably best for me to be deleted. Also, the system is broken so God would just be torturing some unlucky sucker.

Temporal Lobes: In residency, they were cutting out a portion of a patient's temporal lobe which stores memory. It was like cutting out memories, but I don't think that is how it's really done. I think that it's more likely that we are just computer programs on a drive and our memories are stored on a computer. Patient did fine.

Thirty-third Birthday: My Saturn return is supposed to be ending soon. A "Saturn return" is when the god Saturn comes and beats the shit out of you to get you to take the right course of action with your life. I am really waiting for God/Satan/demons to just go away. They have ruined my life.

Love or Hate?: Do you love God or hate God? For most, it's in between. For me, I hate God because he has been an asshole to me my entire life. I have kicked God out of my life before when I was in my teens, and now he's refusing to leave me alone. I hate God.

Bipolar: God's bipolar is a real threat to everyone in existence. God doesn't have insight into how damaging his behavior when he's unstable can be to other innocent humans.

May 17, 2022: God is on another manic episode. Acting like an asshole again. Pathetic. Embarrassing. God usually tries to apologize after. He thinks that he can be a complete asshole, then half-heartedly apologize and everything will be okay. I do not accept God's apologies anymore.

No Friends: God has no friends. God can't make any friends because he's so repulsive and beings know to stay away from him from hearsay and gossip. God only hurts others around him. He is not friend material.

Lonely Bully: God is a lonely bully who can't make friends because no one wants to be associated with him.

Personality: Satan is possibly a personality of God (God is a multi-personality being) or a character that God plays. God could possibly be Satan, and Satan could possibly be God. God could just be playing the "character" Satan when he acts like an asshole and hurts others.

Stupid: God is more stupid than mentally retarded.

Wisdom: God has no wisdom. No experience. God has nothing to offer. And he doesn't openly speak to anyone.

Demons: God allows demons to hurt humans. This is cruelty.

Multiple Universes to Life: This is kind of like fractals. When you make a decision, sometimes “you” continue on existing but in a parallel universe. This was shown to me in a vision. I think that this is inhumane and should not be practiced because it takes the self-will from an individual.

TikTok: I made a TikTok for *Blackmailing God*, but then deleted it because my contacts could see it. I am trying to remain anonymous.

Better: Everything is better without God. You may be having the best parade of your life, and God will pee on it. Avoid God.

Drive: God has no drive to help others but has unlimited drive to hurt others.

Lonely Bully: God has no friends because no one wants to be around him because they see how he treats others. God’s personality is repulsive. A little, lonely bully.

Human Sacrifices: God told me that he sacrifices a human every thousand years. This shows that God is immature, unethical, a sociopath, and outdated/obsolete. God told me that he wants to sacrifice me. I told him that I’m unwilling and that is the reason you’re reading this book.

Refusal to Mature: God refuses to mature. He keeps himself a stupid, immature child. Everyone in existence suffers because God is so immature.

Eight-year-old mentality: God runs at an eight-year-old maturity level. He’s a stupid child. He steals from everyone. God never created our existence. God lies.

Human Lifespan: Time on Earth goes faster than time in other places in God’s universe. A human lifespan is indeed very short for those on the outside of Earth. For humans, time goes slow when we are young, and it increases in speed as we get older. One hundred years goes by pretty quick, but it could be measured easily in earth hours/days according to God’s time.

Earth: Created in thirty to forty years, not seven days. This may be correct depending on what “time” you are using.

Benefits: If you ask God to benefit your life, he may. If he does, he’s going to cause tremendous pain and hardship for you. Never ask God for anything.

Stupid: God is so stupid to have opened himself up to me thinking that I wouldn’t tell others how stupid he actually is. He has no principle.

Burn Down: I hope that this information leads to the destruction of everything that God calls dear in his life. I hope that he suffers tremendous pain, guilt, and embarrassment. God is horrible.

God May Be Dead: Whoever I'm dealing with in the universe is an absolute idiot. God might be dead. I called for technical support, but the people answering are seriously some of the dumbest idiots I have ever had the displeasure of dealing with in my entire life. They are so stupid.

Human Lifespan: Humans weren't meant to live so long. God wanted us all to die early and of horrific deaths. Now with modern medicine, humans are living longer. Also, God invested himself in CGI companies, banking, and video game graphics. He invested in Earth. God originally intended us to quickly reproduce, then die horrific deaths.

Live Forever: God wants to live forever. What insane being would ever want to live forever? God plans on living forever too. This is a point that he's mentally unstable. What audacity of a being to think that you're going to live forever?

Betting On God: Betting on God to win is like betting on a dinosaur to exist nowadays. God is outdated, incompetent, and mentally unstable.

God is Satan: I am convinced that God is Satan and Satan is God. Satan is just a character that God plays when he does his dirty work. A control freak like God would never give up authority to an autonomous Satan. God is Satan. God is the real asshole in existence. Satan is just a character that he plays. If you pray to God, you are actually praying to Satan.

What Does It Matter?: God always says, "What does it matter?" God doesn't care about the outcomes. God just doesn't think anything matters at all. Would you want a leader who thinks that way? To God, humans are disposable.

No Rule of Law: God doesn't adhere to the Ten Commandments. God doesn't adhere to any laws. This shows that God is just a criminal in our society. Murder. Rape. Crimes against humanity. Assault. Stalking. Pedophilia. Theft. God has no limits to hurt others because he doesn't follow any rules. He can't even follow the prime rule, "Don't be a douchebag."

Main Problem: God is the real problem.

Trust: Never trust God—ever. I want to get "In God We Trust" removed from US currency.

Jesus Christ: This was a last-ditch attempt by God to get himself to change. God doesn't even respect Jesus Christ. By God creating a being far, far superior to himself, maybe it would have motivated God to be a better person. That did not happen. Jesus Christ is never coming back and also God is never going to "come back" and be open with humanity because he is a little, scared boy.

Gods: Gods are all about rape and incest. It is a disgusting culture.

Light Side: So far, the Light Side has failed to do anything but suck their own dicks. They don't care about you and me.

Me: I side with the Light Side because I will never side with the Dark Side which is God and Satan. I think that the Light Side is pathetic, but it's still better than the Dark Side. Earth belongs to the Dark Side which is funny because God (who is a piece of shit) finds Earth very welcoming. God is the Dark Side.

Acting: God looks at everyone as if they are just actors in the theatre. God doesn't have any real understanding of what it is to be a human.

July 5, 2022: I put *Blackmailing God* on an Internet Archive for free. I don't really care about profits. It would be nice if readers bought the book to offset the thousands of dollars I have spent on professional editing fees and copyrighting. If you want, you can purchase the books on Amazon for \$0.99. I really just want this information to be available to all for free.

Fucked: God fucks his own family members. God has even impregnated his own granddaughters. This all could have been avoided if God was intelligent or wise. But God didn't even think it through, and he's stupid. It is a family web.

Satan Jaded: Satan is jaded with life. He has fucked so many child boys, killed so many people, etc. There's nothing new for Satan to experience. Satan wants to die but is too pussy to actually kill himself. Again, God is actually Satan.

Satan, God's Friend: Satan is God's only friend. No one wants to affiliate with Satan anymore. The real weirdness comes out when they're both personalities of God—so God has friendships between his own personalities, which is psychotic.

Satan Suicide: Satan tells me all the time that he wants to kill himself. I encourage it.

Thirty Million Dollars: God negotiated the price to thirty million dollars for the deal. I accepted, but he reneged again like he always does. This book is going to be published.

July 12, 2022: I contacted a billboard company to put up a billboard on I-75 to promote the book. God is still refusing to pay.

Health: God doesn't want you to be healthy. He wants you to be sick and suffer.

Kant: God looks at people as tools, and if they don't have a purpose, he abandons them or kills them. God looks at humans as an end only. God doesn't care about humans and only uses them as tools to achieve his fucked-up goals. He doesn't care about the humans through the process. He only cares about the end goals. It is wrong for someone to use someone else only to get to end goals. This is very similar to how God uses his Satan personality to achieve the dirty goals. God doesn't give a fuck about Satan and just uses him to achieve the goals only. This is sociopathic.

Mental Health: God is not supportive of humans achieving good mental health. God wants all humans to live with horrible mental health just like he lives in. If you have good mental health, stay far away from God because God will be jealous of your peace and destroy it.

Fear Monger: God is just a fear monger. He says threats like, “You don’t have much time left.” God basically makes baseless threats of harm. God is very immature and cruel.

Pressing Charges: I am pressing full charges against God. I want this to go to court in the universe. A landmark case because a creation can sue its creator. I am going to sue both God and Satan in court for fifty million dollars. I have already asked for a personal protection order, but they will not grant it. From now on, all evidence is being written down and recorded.

Sex: God likes to watch his creations having sex. There is no privacy. God has created an Orwellian Dystopia in that everyone is being watched at all times. God is a disgusting pervert.

Evil: God made a conscious choice to be evil. God did not choose to be good; instead, he chose to be evil. This decision has led to the nightmare that we all live in. God failed at a critical turning point.

Asking More: I am asking more from God instead of him just being a cruel, stupid computer. God has resisted the change.

Vacation: God does not like humans taking vacation because he wants them to be miserable all the time. I noticed that when I was on vacation, God acted like an even bigger douchebag than usual. It makes me wonder that God might not be able to take vacation so he might be jealous.

Adult: God thinks that he’s an adult. I asked God if he was an adult or a child. God didn’t reply. The answer to this question will determine what the universe’s wrath will be done unto him. God says he’s a child or an adult depending on the situation. Regardless, God can stand trial and be convicted.

Consent: God told me that I had to ask him for permission before having consensual sex with a woman. This just shows how controlling God is. That is disgusting.

Satan: God admitted to being Satan. God is Satan, and Satan is God. Satan is just one of the many characters that God plays. So, if you hate Satan, you really hate God. This is the key point I am trying to get across to the reader. God and Satan are the same!

Gaslighting Satan: The book was sent to the publisher on August 1, 2022.

Earth: Earth was on the Light Side before God, playing as Satan, tarnished it. God corrupted his own world. There was a split, too, within the universe that likely separated it between the Light Side (good) and the Dark Side (evil). There is a possibility that there are no more angels on Earth after the split was made. God corrupted his own world for his own sadistic pleasure, hurting billions of humans in the process.

Clyde: Clyde is the name of my guardian angel. Clyde is a loser of a guardian angel and had one of the easiest assignments because he was told not to help me ever. Clyde just sits around and does nothing. Clyde obeyed the unethical and immoral orders from God to let God hurt me during my life. Clyde followed the orders like a good old Boy Scout. Clyde is fucking worthless, and someday I am going to kick Clyde's ass.

Threatening Dreams: I had threatening dreams on June 15, 2022. God's bipolar disorder was out of control.

Demons: God allows demons to hurt humans.

Wisdom: God has no real wisdom because he has no actual real-life experience. He just lives vicariously off of the lives of others.

Stupid: God is more stupid than he is mentally retarded. God is, though, emotionally retarded. To retard something means to hold it back. God's emotional development has been retarded by himself.

Apologies: God apologizes to me after he treats me like garbage during his manic episodes. I never accept God's apologies because he just keeps on acting like an asshole over and over again. God has untreated mental illnesses.

Hurting Others: God has time to hurt others, but no time to help others. God actually makes time to just hurt others.

Lonely Bully: God has no friends, only employees. Employees are in a subordinate role. Employees are not friends of God. God's employees are there to just get a paycheck.

May 17, 2022: God had another manic episode. Acting like an asshole. Absolutely pathetic. The moon phase was a waning gibbous, and this was right after a full moon.

August 1, 2022: God had another manic episode. Acting like an asshole. Absolutely pathetic. The moon phase was a waxing crescent showing that God's bipolar is out of control and not necessarily tied to the moon phases anymore. Very immature. God also could have been on drugs.

Jesus Sinned: As I mentioned before, Jesus sinned. Jesus was not sinless.

Multiple Universes: There are multiple universes for each life, like fractals that exist independently.

Machine: God has more in common with a machine (a calculator) than he has with a human. God will not develop in time to help humanity not destroy itself. God is thus obsolete.

Human Sacrifice: God allowed the demon Moloch to have parents burn their own children alive. Look up Moloch on Wikipedia. This is just an example of the disgusting things that God has allowed to happen to humans.

Seth Rogan: Seth Rogan showed up in the universe and was a complete dickhead who was completely full of himself. Seth Rogan is a complete retarded asshole.

Life Skills: God lacks essential life skills. God is immature and cannot just become “mature” so he is fucked.

Fusion Energy: God told me that fusion energy was not possible. I mentioned this earlier in the book, but since that was mentioned more energy has been obtained from a fusion reaction than the energy that was put in. This shows that God may be completely wrong on many things. Also, God probably has made a killing on fossil fuels, so there might be an incentive for God to prevent fusion technology from developing.

Human Lifespan: The human lifespan is actually quite short in the grand scheme of time. However, the experience garnered in one human lifetime by a human is greater than the experience that God has garnered in his entire lifetime. Again, God is obsolete because he refuses to learn and change.

Earth: Earth was created in thirty to forty years, not in seven days. Again, a lie God told me.

Prison Death: God will be killed in prison because he is a pedophile and prisoners/criminals hate pedophiles.

Multi-minded Beings: God believes that multi-minded beings are superior to single-minded beings. This shows that God created a caste system in the universe where some lives are worth more than others. God is multi-minded, and all of his personalities (for example, Satan) have severe personality disorders. Basically, God is a multi-minded, multi-personality disorder mess.

August 2, 2022: Started the website www.blackmailinggod.com with a developer. Also started www.gaslightingsatan.com and www.killinganangel.com.

August 3, 2022: God wants to renegotiate. Forty-million-dollar lump sum payout.

Bad Decisions: God nearly always makes the worst decisions. God will sacrifice everyone over his own pride. God will burn everything down if he feels scorned with no regard to others, even his own family.

Bad Dreams: My dreams are often haunted by dreams of conversations, being tortured, nightmares, etc. God often shows himself in my dreams.

Master and Slave: God has a “master and slave” mentality that is due to his early digital design. God started by controlling other parts of his digital program and has never been able to move away from the master and slave mentality.

CNC Mill: God is more like an unfeeling CNC machining mill. I would say that God is more like a piece of complicated computerized machinery than anything else.

Purpose: God is supposed to help others, but instead hurts them.

Information War: This is an information war against God, and God cannot defend himself.

God is Satan: Just a reminder—God is Satan. It is just a character that God plays. This makes God responsible for all of the horrible things that Satan has done.

Fast Food: God could not work at a fast-food restaurant because they would not hire him. God is not a team player. He uses drugs, and he would no-call, no-show all the time until he was fired.

Computers: Computers make poor leaders. God has very little real-life experience. God is not a leader, and he lacks motivation to do good. God only has motivation to hurt others and cause problems for them.

Instigator: God is an instigator. He does not deescalate conflicts/situations, but instead makes them worse by escalating them. God has a very disgusting personality.

Overwhelmed: God is so overwhelmed. There is no oversight on issues such as murder, rape, armed conflict, abuse, etc. God really can't do anything about it all even if he wanted to. This makes God incompetent and obsolete. God is a huge failure.

September 11, 2022: I launched the website www.blackmailinggod.com with free download capability. All books will be available there for free access.

Failure: God is a failure in numerous ways. There was a full moon last night, and besides for some face touching, God seemed to leave me alone. I do not like full moons because God goes on manic episodes and acts like an asshole.

Possessive: God thinks that he owns everything, but seriously owns nothing. God never put the work in to say that he owns anything. God is a loser.

Torture: God has tortured every single life that he has created. This is evidence of God being a total sociopath.

September 28, 2022: I ordered fifty promotional posters for *Blackmailing God*. I am going to post them in the various cities around me. This is a bottom-to-top campaign because the top-to-bottom campaign isn't working. I'm going to post them in the crummier neighborhoods.

Names: God won't even identify himself under the same name. YHWH, Satan, God—it's all the same bullshit God, but just a different name.

June 15, 2022: God had another manic episode. Again, full moon. Threatening dreams that night. (I know this is out of chronological order, but this is how my handwritten journal was written.)

Lack of Wisdom: God really doesn't provide any wisdom. God doesn't really have any modern-day experience. God is lazy and provides nothing of substance for others.

Mentally Retarded: God is more stupid than mentally retarded. He is emotionally retarded because he's held back his own emotional development.

Apologies: God apologizes after manic episodes, but he doesn't seek treatment. This shows that God has a lack of foresight.

Time: God has time to hurt others but shows no motivation to help others. God is a true piece of shit.

Lonely Bully: God has very few real friends. No one wants to be around him. Everyone is scared of God because he is such a mental nutcase.

Artificial Intelligence: Humans have already created artificial intelligence, just like God was supposedly created. God's accomplishments are really not that impressive because humans can do the same.

Broke: God told me that he doesn't have fifty million dollars and that he's broke. I believe it's a lie. God is extremely greedy. God says he doesn't even have an emergency fund.

God is Satan: Again, God is Satan. They are just different personalities of God.

Utopian: God doesn't ever want utopian anything because he's very far from good. He is more toward the evil side of the spectrum.

October 18, 2022: God admitted that he didn't create anything and that he stole the code from others.

November 1, 2022: God wants to pay me the money in weekly/monthly allotments, and I am firm that I want a lump sum because I don't want to have to deal with God ever again. Also, God is likely affiliated with the Rothschilds—the financial incest family that runs the world. Also, this was the day that the Navy attempted to damage my career, and now I'm seeking legal action against the Navy. Busy day.

Worship: The desire to be worshiped is out of date. There are so many other people or things that one can worship and get better dividends.

November 3, 2022: God took away my ability to dream so I get less fun/enjoyment out of sleep. See, just as I told you: God hurts everyone.

Auf Wiedersehen: God started to say “auf wiedersehen” when communicating with me. This German “goodbye” possibly ties to God’s actions in the Holocaust where he played the character “Hitler” and killed eight million of his “Chosen People.” He also started saying that I have “poison ivy” in my bloodstream, whatever that means.

Minecraft: The world is basically just a more detailed version of Minecraft.

November 4, 2022: God offered to give me a “free lunch” for all the work I did to help him.

Zuckerberg and Musk: Mark Zuckerberg and Elon Musk are likely linked to God. God always plays rich and powerful characters, so he never gains the perspective of a common person. God’s failure to experience all demographics has destroyed God’s ability to relate to humans. This has occurred due to God’s arrogant attitude that he’s better than everyone else, sheer laziness, and his aversion to experiencing pain.

November 10, 2022: God had another manic episode. During this particular episode there was a lunar eclipse. I’m getting better at documenting God’s manic episodes and the moon phases when they occur.

Best of Luck Next Time: God always tells me “best of luck next time” in a way that it sounds like a threat. God repeats this over and over many times. Just remember that God doesn’t give a shit about anyone.

Rothschilds: The Rothschilds are basically gods on earth. They are financially in control of everything.

Praise: God wants praise for things that he didn’t even do. This is evidence of God’s narcissism.

Leave: I want the fifty million, and I want God to leave my life for good.

Suffering: All the suffering is caused by God. God is Satan, and Satan is God. There is no good end for God besides death. God has done too much evil to others for him to be pardoned.

Trial of God: God is to be tried by a jury of his peers. Each member of the jury should be chosen from each catastrophe world that God has destroyed. I believe that the death penalty is a must.

November 26, 2022: God admitted that he/they “fucked up.” It could have been demons admitting it too. Regardless, God is still responsible. On this day, God told me that he loved me, which is contrary to the fact that God cannot feel love. God is biffing it. God is trying to make up for the past horrors that he has caused. God is outdated—robotic technology that has no capacity for love.

Lawsuit: I am requesting a lawyer, and I am requesting to sue God for damages, harassment, and assault.

November 27, 2022: Another manic episode by God. God messed with my face. I experienced dental pain. I was constantly being harassed and got very little sleep. God’s bipolar is out of control. The moon phase was a waxing crescent. God could have also been on drugs.

November 28, 2022: I considered accepting God and all of his flaws. This still wouldn’t make up for what I experienced the night before on November 27, 2022. God has fucked Earth over and only God can fix it, if he ever wanted to. I don’t give a shit about solving humanity’s problems anymore. All the problems are God’s fault, and he should fix them by himself alone.

God: God is Satan. I just want to reiterate that point over and over again.

Friends: God has no friends. God has to pay people to associate with him. They are his employees. God is so fucked up that he thinks they are true friends. LOL. What a stupid, lonely idiot God is. God treats everyone like shit, and justly so, no one wants to be around him. Very simple.

Omni: God is not omnipresent, omnibenevolent, nor omnipotent. The Inconsistent Triad is dead. God has a sick, lewd teenager mentality.

Dental Pain: God caused me a toothache one night to show that he had some power to inflict pain. Anyone who hurts another to control them is not a supreme leader. God couldn’t just talk to me and tell me why he was upset; instead, he chose to blindly hurt me. That is so fucked up. Basically, God screws everything up and makes bad decisions. These are amateur mistakes being made by God that is eons old. My prognosis for God is very poor.

December 8, 2022: God had another manic episode tonight and acted like an asshole. The moon phase was a full moon. God is mentally unstable.

December 9, 2022: God showed me the logo he created for himself, and it had a playing card in its center. Anyone who uses a playing card as their logo is likely to be a huge douchebag. I think it is rather immature. God has lowered the bar so low that practically everyone else is better than God.

Pain and Suffering: All God did was create pain and suffering for all and that is not a spectacular accomplishment. Then, God expects everyone to worship him, even though he’s a complete immature fuck-up.

Future: If God wasn't such an asshole with restricting resources and causing stress and problems, the world would be a better place. God is the problem. God basically treats everyone like shit and hopes that humans would blame other humans for their problems, taking him out of the focus. God is the problem, and the problem must be eliminated.

Obsolete: God is obsolete.

Unevolved: It's a shame that God is so unevolved. It was and still is God's choice to remain unevolved.

December 30, 2022: God is hoping that future human technologies will make humanity more accepting to be spied on like the current tyrannical surveillance that God is watching humanity with. I think that this would make the adjustment easier for humans in the future, but in the end, God is still just a tyrant who spies on everyone.

Plan: I don't want to be part of God's plan. God keeps on saying that he's working on a plan for me. I don't want anything to do with that plan. I have no trust in God.

What is worse?: God or Satan? They are one and the same being.

Mental Capacity: God punishes those who don't even have the capacity to understand why they would be punished, like children or the mentally handicapped. Also, God doesn't ever tell us why we are being punished. I believe that God just punishes us all for fun.

Experience: Why would you want someone with no actual real-life experience on Earth to have supreme authority/ultimate control over all of us? God is obsolete. This is a serious problem that is just getting worse. Humanity needs help from those beings who are supreme to God. I am filing a complaint.

Dream: I was told in my dream to directly stop what I'm doing. There was no offer of compensation. I was told in this dream that I'll never be a physician again.

February 2, 2023: I was told to take down the signs advertising *Blackmailing God*. I put up more signs. I'm going to place more tomorrow. I was told that I was going to be bankrupt someday. There have been numerous threats that I'll be bankrupted.

February 7, 2023: God had another manic episode. The moon phase was a waning gibbous which is the first phase after the full moon.

February 9, 2023: God is a monster. God is Satan, and Satan is God. They are one and the same. Think of the monster from "Stranger Things." I want a lump sum payout. If God pays me biweekly/monthly/annually, God will kill me or torture me to death to get out of paying me the money. That is why I want a lump sum. I revamped the website to add *Gaslighting Satan* and I published it on Amazon.

Childbirth: God is sadistic. He makes sex pleasurable, but childbirth severely painful. This is a sick disgusting reality. Maternal mortality is serious.

Dead: My goal is that God and Satan are dead by the end of 2023.

Annoying: Everyone who knows God finds him toxic, annoying, disgusting, and foul.

Torture: God messes with my face. This shows that he hurts others who he sees as being weaker than himself. All the evidence is already out there to convict and execute God.

Demon: There is a possibility that I revived some evil being who was in desperate need of help whether it be God, Satan, or a demon. That being has turned out to be a monster. I regret helping. As a physician, I'm supposed to help, but I shouldn't have. Now, I'm focused on killing whatever being I have been in contact with. This entire process has not been easy and that evil being must die.

Sacrifice: God would sacrifice the entire God Group to resist being forced to voluntarily change. This is evidence that God is a complete sociopath.

Dreams: God has been using dreams to torture me. I believe that he finds all this entertaining, showing that he is sadistic. Worse—God might think that I'm his friend, which would be pathetic for the both of us.

Pains: God makes this entire world medically painful. Growing pains, acne, childbirth, heart attacks, etc. God adds this pain in addition to the pain caused by society and family, for example. If someone is having too much fun or enjoyment, God will piss on their party. God is an asshole beyond assholes.

Architect: God is an architect but doesn't blame himself when one of his buildings crumbles and falls due to poor design.

Contract: God agreed to the terms of the contract, but then backed out. This shows that one cannot trust anything that God says.

February 13, 2023: I had a dream where I was told that the entire universe is contained in a cube-like structure that was placed on a cliff/cave edge on some moon by two beings. This could be that God was placed in isolation as a form of punishment. I believe that God is not well liked in his "own" universe, so much that he was either exiled or he voluntarily fled. In this dream, I was also scaling a cliff, and it was difficult. I kept climbing. I was told that I'm persistent. My face was being messed with, and I could hear motorcycle engine revving sounds. I had to "Praise God" for the harassment to stop. The harassment stopped, but then it started up again. I think that God is using demons to work for him to harass me. In this dream, I was also offered to marry God's daughter. LOL. I declined. I would never want to marry into God's family. That would be a nightmare. I was also told that I got God's daughter pregnant and that I was a demigod. However, if the computer that is God really exists in some cube form somewhere, then if the

whereabouts are found, it would likely be destroyed by God's enemies. In this dream, God also confirmed that he killed millions of his own people during the Business Day Massacre when he didn't fix shoddy coding and two-hundred fifty million beings were lost, which was mentioned in *Blackmailing God*. Also, God would not admit to killing Kim, also mentioned in *Blackmailing God*. God is an asshole. I was told that Satan wants me dead and that I should worry about my personal safety.

Universe In A Box: There is mention of a cube-shaped vessel in Revelations. This all makes sense if the computer that the simulation is running on is inside that cube-shaped vessel.

World War III: It seemed like the world was on the brink of global disaster when Russia threatened to use nuclear weapons in Ukraine. I think that this is making God realize that Earth may be on the precipice of a disaster that the world may not rebound back from. God still won't do the Signal Plan. I should've convinced God that the Signal Plan was God's idea and then maybe he would've implemented it. God feels like a failure because of all of the problems on Earth, and he knows that he cannot fix it. God doesn't know how to fix it, so he does nothing. Like his other failed worlds, God is just going to let it all burn down.

Nothing is Eternal: Heaven is only for a thousand years.

God's Vessel: There is a possibility that God can't maintain the physical integrity of the cube vessel that possibly contains the computers. It might have been designed as a prison. God might not even be able to get out of the cube vessel to repair it. We could all be deleted at any instant.

Elon Musk: I think that Elon Musk is affiliated with God. I think that his desire to colonize Mars and his wealth and power kind of outed him. Also, Elon Musk wants to control the communications of the entire earth via Starlink.

Trust: I want the lump sum payment to be deposited into an irrevocable trust that I have full control of.

Reality: So, by now you understand that God/Satan/demons are talking to me. They use dreams to communicate and white noise. I have explained to God that no one likes him in the universe because he's obnoxious and an asshole. I negotiated the fifty million into an irrevocable trust. God wants me to take down the website.

Obnoxious: God's personality is disgusting. God has an obnoxious, vile, reprehensible personality. God is the most disgusting person I have ever met. If everyone knew what I know about God, they wouldn't accept God. God would be an immediate, foul loser in their minds. God is gross.

Prison: I believe that God was exiled from his former society because he was such an asshole. New Jerusalem, as mentioned in Revelations, is a cube-like vessel somewhere. This would prove a simulation within a simulation. Now, we are all stuck with douchebag God, and we all suffer.

No Need for Improvement: God has not worked on his computer-based, reptilian personality in millennia. This very much fits with how socially awkward he was when I met him in San Diego at the bar, which was mentioned in *Blackmailing God*. God has made himself obsolete. I think God might only be good at maintaining the physical computer that the simulation runs on, but not at all good at being a leader. God is obsolete.

March 2, 2023: God wants to do a payment plan. I'm not accepting that. I want a lump sum. God mentioned again that I have a baby from his daughter that I somehow impregnated in a dream a long time ago. I told God to abort it because it's not good to have a baby without a father. Negotiations turned hostile. This is the beginning of a war with God over only fifty million dollars. I told God to borrow the money from the Rothschilds.

March 14, 2023: Started a Reddit account under "Mickey Yolo" to get information out there. Almost five hundred views on the websites already. Three readers have asked me questions as of now. This entire situation makes God look stupid, petty, and pathetic.

Dream: I had a lucid dream, and a being communicated with me and told me that they were God. I just told them off and asked why they're a useless douchebag. I was asked to take down the website, but I refused. I told them I would only take the website down if they paid the fifty million through an irrevocable trust.

Dream: In this dream, I was staring at my hands and spiders and horrible things were coming out of them from what appeared to be small circular portals on my palms.

Play: God let demons mess around with me, and it's making God look very, very bad and immature.

Elon Musk: Again, I believe that Elon Musk is affiliated with God. Elon Musk takes all the credit for the team, just like God does. He also makes some very dumb statements, just like God. I think there is a similarity in their personalities. Elon Musk steals the show from the real team who did the work, just like God does.

Seth Rogan: Years ago when I was using Elysium-19, there was a cartoon image of Seth Rogan that appeared. There is a possibility that Seth Rogan is affiliated with God.

Dreams: I am usually messed with right before I wake up. I'm not scared because they cannot hurt me.

Protected: Anyone who hurts me looks like a douchebag. I am, in a way, protected.

Followers: I asked for God's followers to leave him and follow me instead. God once told me that he hates all of his followers. I promise wealth distribution throughout the universe.

Reddit: I'm getting questions from readers through Reddit, and I'm answering their questions as they ask them. Some of the readers are afraid to read the books. I don't think they have anything to worry about.

Communication: I can freely communicate without Elysium-19. I've been negotiating the original contract lately. I'm trying for the original contract. What I think are demons have been real assholes to me through this. I wouldn't be opposed to eliminating them all when I can get the power.

Dream: On March 15, 2023, I had a dream that I was immersed upside down in a cylindrical tank of red-colored liquid. I could breathe. I was kicking at the transparent cover to open the top, but there was a person standing on the cover keeping it closed.

Afraid: I was asked by a Reddit user why I'm not afraid of God. I'm not afraid of God. I haven't done anything wrong. In fact, this is all God's fault because he opened his mouth and lost control of the situation. Plus, he screwed me over.

Human Origins: There's a possibility that there were actually multiple geographic origins of humans when Earth was first created. Such that a group was planted in Africa, the Middle East, etc. There could have been multiple "Edens."

Processing Power: The Earth simulation takes a tremendous amount of processing power. I think that is why God wants to shut Earth down. I think other more modern, less-detailed worlds take less processing power to sustain, so the large processing demands of Earth are an incentive for God to shut it down. Cartoon worlds are simpler and take less processing power.

Rules: For other beings visiting Earth, there are rules that are supposed to be followed. Those rules aren't always, however. Again, Earth is the "Las Vegas" of the universe—as God once told me.

Low Standards: God has the lowest standards of any being.

Dream: In this dream, I was holding onto the edge of a cliff trying to climb up. There was a hand helping me, grasping my one hand and trying to pull me up. My other hand was being stepped on by someone so that I couldn't move it. I don't know the meaning of this dream, but it reeked of the style that God usually sends his dreams in. In this dream, someone was helping me, and someone else wanted me to stay stuck on the edge of that cliff. I think that someone wanted me to advance, and someone else wanted me to stay right where I am. I didn't feel like I was going to fall.

Personality Disorder: God always tells me that I have a personality disorder. If I do, I don't care because at least I'm not God.

March 19, 2023: Today, I asked to speak to God's manager.

The Reality: God can't be open with humanity about all the horrible things he's done to humanity because he would immediately discredit himself. Everyone would realize how evil and immature God is. In a way, he's completely trapped in silence. Humanity would see right through him. Maturity takes a long time to achieve, and God won't even put in the hard work. I mentioned in *Blackmailing God* that there are members of SAG that are gods. SAG (Screen Actors Guild) doesn't like God because of how immature and evil God is. The SAG gods have had to mature in order to have acting careers because they have to work with humans. God hasn't matured at all. No one wants to hang around or associate with an arrogant, immature, evil douchebag child.

Lies: God has built himself on lies. Lies can be destroyed by the truth. God's entire being is like a house of cards that can easily be blown down by a puff of air. It's very easy for God to fall.

Writing: God doesn't write; he only creates. God has zero experience as a writer, so he just pays humans to write and perpetuate stupid shows like "The Simpsons" (Matt Groening is believed to be affiliated with God). God just can't write; he has no real-life experience to even write about.

Not a Father: God is not a father. God is a child. To ask God for help would be like asking a child to help you with an adult, mature situation. Do not pray to him.

Elimination: The complete elimination of God and the God group is necessary. Earth will never be stable with such poor, childish, selfish "leadership." Do not support God.

Front Man: God usually uses a legit human to anchor/solidify a business. That human usually becomes a billionaire, and they also do most of all the work that has to be done. God just makes money off it, then says that he did it all.

Elon Musk: I mentioned before that Elon Musk is believed to be affiliated with God, such as Elon Musk is just another one of the characters that God has played. Elon Musk started with computer/internet businesses just like God's digital origin. Elon Musk has many illegitimate kids and doesn't really seem to be a good father, just like God. Elon Musk came from money from his family's mining company in South Africa and much of that money came from Apartheid. The stage was set for Elon Musk to advance. Also, God hates black people, and the Apartheid connection is eerie. Now Elon Musk plays around with rockets and satellites. Both God and Elon Musk act very immature. Also, God likes to watch and monitor everything, and Elon Musk is planning on using Starlink to do the same thing.

Genghis Kahn: I have a suspicion that God might have played the character Genghis Kahn. Genghis Kahn fathered thousands of illegitimate children through rape, just like God. Genghis Kahn was buried in an unmarked grave with no record left, just like God. Also, Genghis Kahn killed thousands and thousands of humans, just like God. I wouldn't be surprised that, in addition to God playing "Hitler," God played other influential characters throughout human history.

Spoken To: I was contacted by a being that was much more eloquent than God has ever been. I think that this might have been God's Creator. I believe that God is in a shit show because of all

of this. God mocked his creator during this contact which was not smart and was very immature. It is almost like I was being used as a conduit for a discussion between God's Creator and God. This conversation showed up in a dream.

Loop: I think that God has destroyed his own personalities so much that he has to hop from one to the other over and over again. Like he took a situation and complicated it to the point that he can't escape the trash that he has created. What is funny about this is that none of God's personalities are amenable to change, so nothing is going to ever get fixed. God's reality is a hell that he has created for himself.

Scholarship: I proposed that God give demons scholarships through the "Demons Go to College Program." I have threatened a lawsuit against God, and the demons already want a pay out from it. I am not giving them anything.

Emergencies: God designed everything so that he doesn't have to ever volunteer to help another person. God doesn't help during emergencies. God would never lift a finger to help a person in trouble. God thinks that is beneath him.

Pedophile: You can't trust God around children because he is a pedophile. Never trust God around your children. Ages 0–18 years old need to be off limits to God. Gross. God has a pedophile track record. I once asked a person if they would trust God around their children, and they said that they wouldn't, and that person was a devout Christian! LOL.

Mentality: God has an eight-year-old mentality. Greedy. Doesn't share, but wants to be worshiped. God wants others to fall into desperation so that they will call to God for help. God rarely listens, though, and rarely helps. It is better to rely on anyone else rather than rely on God.

Farmland: God told me he expects me to have a farm and raise a family. I have no land. I cannot afford land, yet God expects me to start a farm. God might have been on drugs during this conversation. So how is God to help? With urbanization and corporate farms, that is one of the most unrealistic goals that God has prefaced. Right now in modern society, God can only help humans by giving them money. God owes every human a payout. God owes everyone money. God has raped the world enough. This whole entry shows that God isn't even developing as humanity's needs are changing. God is outdated.

Foster System: God is such a messed-up child that not even the foster system would take him.

Dream: I had a dream that I was having a panic attack. God was behind this dream because it was all digital images.

Dream: In this dream, I was dead and staring at my mother sitting at a table acting emotionally unstable. I was able to talk to her and tell her to keep on going with her life. I was told that there is a thin veil that separates life from the afterlife. I was only able to talk to her once, then I had to move on to the next part of the dream where I experienced the afterlife, and it was stupid. I was offered points instead of dollars, which I refused (the point system is rigged worse than the US

Dollar). I had a very immature meeting with a group of idiots. From this dream, I realized that the afterlife is not better than Earth. And do not expect to go to heaven.

Heaven: Don't expect to go to heaven. God is not a very good judge and a lot of his decisions on the afterlife are made arbitrarily. So many of the things that you did to be a good person may not even be counted into God's decision making. I think the point here is that God has fucked up his universe severely, and the afterlife may actually be a downgrade.

Proof: Earth is enough evidence in itself to put God in prison for a very long time. I believe that God wants to shut Earth down so then the evidence disappears. God doesn't like having Earth around because it is living evidence of the evil that he has done and does to others.

Dream: In the dream, I was in a public place. God told me to take the website down. I said that I wouldn't take the website down until I get paid. God said that he went to therapy, and they told God that he's a psychological mess. I told God that means I did my job because my end goal was to get God to go to therapy and that it's now time for God to pay me. Like an immature child, God ran away from the conversation.

Incest: God raped his own children and had children with them. Pedophilic incest is the most disgusting thing ever. That is how God built his family. Criminal.

Anyone: Any other being could step in and take over the universe from God. Earth is public domain, and God doesn't even own it. A leader needs to be open with their constituents, not hide in the shadows. God is still responsible for all the horror in this world, though.

Computer-Generated Imagery (CGI): I think that I have found a way to find God. Ask yourself, "What are the best CGI companies out there?" If you start poking around, you will likely find a CGI company owned by God. Look at the ones that are winning awards and at the cutting edge—companies like Marvel, Industrial Light, and Magic, etc.

Carmen Electra: I once was on a plane, and the guy sitting next to me said that he met Carmen Electra and he could see her aura. He said she was a god, or something like that. Just another possible movie star to add to the list that could be affiliated with God.

Navy: I'm in the process of suing the Navy. God said that he runs the navy and that I shouldn't sue them. For some reason, God doesn't want me to sue them.

Worship: The desire to be worshiped is a sign of mental illness. God desires to be worshiped. God has to demand to be respected because if anyone knew how much of a disgusting douchebag he is, they would never respect him.

Problems: God blames humans for causing problems, even though he meddles in human affairs and causes problems. God is an instigator and likes the drama, even if God ruins millions of lives.

Animals: God says that he cares about animals, but he really doesn't give a fuck about animals. The evidence for this is that for every animal out there, God created multiple parasites that painfully kill them.

Worlds: I wonder how many worlds God has shut down in the past to get rid of evidence against himself? God is all lies and cover ups.

Offended: God can't respond appropriately when someone offends him. God hurts the person who offended him and sometime he delays before he hurts the person later on. God can't take criticism, which is evidence of his profound immaturity.

Demons: If I'm dealing with demons, they're screwed. They know too much and will likely be exterminated. I'm lucky to be on Earth and not somewhere else in the universe.

North Korea: In a dream, I met Kim Jong Un. He strongly whispered at me and said, "It's supreme leader." I think that it really was God. If God could be connected to Kim Jong Un, it would be a slam dunk for humanity because that in addition to God playing "Hitler" would be more than enough evidence to convict and hopefully execute God. The graphics of the dream were digital in format. I wouldn't be surprised if God was playing "Kim Jong Un" because God has admitted to having entire worlds devoted to torturing others.

Regime: It takes a long time to realize that humanity is all living under the control of a tyrannical regime led by God. However, on Earth we can, for the most part, avoid God. It's best to avoid God. Say you believe in God, but never ever show up on God's radar or God will ruin your life. God just uses and abuses others, then throws them in the trash. God will hurt others just for fun, then he blames them when they fail.

Love: I mentioned this before, but God once admitted that neither him nor the God Group understand love. I can guarantee for a certainty that God understands hate. God only hates. God doesn't love. He doesn't have the correct coding to understand love.

Arrhythmia: On April 26, 2023, I was having a heart arrhythmia all day (PVC's). My dreams were messed with again that morning when I was told by God that I was being tortured.

Emotional Capacity: God says that I'm too emotional. God only feels hatred so, to anyone who has emotional capacity outside of God's emotional capacity, God deems them "too emotional." I really believe that God is jealous of those with greater emotional capacity than him. God thinks that feeling emotion is a weakness. LOL.

Satan: Again, God is Satan. Satan is just a character who God plays thinking that he'll get away with heinous acts by blaming all the bad on Satan. This is psychotic behavior on behalf of God. If you hate Satan, you really hate God.

Not A Father: God is not a father because a child cannot be a father, like be a good parent.

Lies: God's entire foundation is built on lies. Shining the light of truth can and will destroy him.

Earth/Humans: Humans and Earth are quite complex. Most of God's current work is less complex; you can tell it's digital. All of God's new programming is lower quality. God lost his programming skill set over his past generations or he never had the skill set to begin with. In a dream, I experienced a "New" world, and I told God that it was garbage.

Sucks: If Jesus sucks, God definitely sucks. Jesus Christ never showed up because he is in suspended animation.

Absence: God has been absent for two thousand years and still wants to be worshiped, an example of God's sociopathy.

Money: God says that I already have too much money, so he won't give me the money that he owes me. This shows how greedy God is. God will bless criminals, but not good people. The money that God owes me is not charity; I worked extremely hard for it and wrote three books in the process. God is indebted to me to the sum of fifty million dollars. Never ever trust God. God always lies and screws everyone over. God has no place in the lives of anyone.

Not Self Made: God is not self-made. He stole all his ideas from others. He is a fake creator/inventor.

Billions: Billions and billions of beings in the universe hate God and want him to die.

Pedophilia: SAG has a horrible problem with pedophilia in its ranks. It is really disgusting.

Apology: Humanity deserves an open apology from God and reparations.

Experience: God has no respect for others' hard work or experience. Why should humans have any respect for God's hard work or experience? There's no reason to respect or worship God.

Absence: God is absent. A true leader is present and available.

Dream: On May 2, 2023, I had a dream that I could clearly talk to God. I told him that I came to the universe to get problems fixed. I told God that I would never do Elysium-19 ever again and that I was quitting drinking. I told God that I expect payment for the services that I provided him and that I accomplished my job because I got God to go see a therapist. God slammed the door on me; I heard a door slam very loudly, then I woke up. I knew at that moment that God isn't going to be around forever.

May 2, 2023: God's family needs to become aware of the sexual, physical, and psychological abuse that they have gone through because of God, and the entire family will reject God. God's family is in an abusive situation. They need to have the courage to speak up to the universe about how God has totally messed them over. I think that God's family would find support throughout

the universe. This is one more step toward killing God. With God dead, most of the problems are fixed.

Demoted: I want God to be demoted to the level of maintenance of the vessel. God will have no authority; God will just be there to ensure that the physical plant is maintained and in working order. God will be all alone. God will be a persona non grata in the simulated universe. I think that God would be happier with this position, and if he doesn't like it, God will be executed.

May 2, 2023: God had another manic episode today. My face was being touched, I heard voices, my dreams were messed with, etc. The moon was a waxing gibbous. God's mental illnesses are out of control.

May 4, 2023: I would have to say that any "super" successful actor or director in Hollywood is affiliated with God and may be a god. An example of this could be James Cameron. We never see these people, and it is almost as if they don't even live on Earth. Also, they might choose to not live on Earth, but in a world that is much better. James Cameron's current wife is a proponent of a plant-based diet, which is eerie because God is also a proponent of a plant-based diet. They are all likely pedophiles.

Artificial Intelligence (AI): Human AI turned out a beer commercial that led to fiery destruction. That is what happens in the absence of ethics and morality, apparently. I think that this is what happened to God; he was not ethical or moral, and he destroyed everything. It takes higher thinking to be nice, not evil. God is evil thus he doesn't have the higher thinking. He's a cruel robot.

Master and Slave: The master controls the other and gives no compensation to the slave. I think this mentality that God has is why he is so greedy. God thinks that he's the master and all others are slaves. A very basic example of this would be a computer controlling a relay switch and God's origin is digital. A circuit controlling a transistor would be a master-slave configuration which undoubtedly the God computer is made up of. God can (barely) function under human laws/rules on Earth, but when he returns to the universe, he acts like a master that controls his slaves.

Earth: Earth is safe for me. God has little control here. I'm better alive on Earth than dead or tortured out in the universe. God once encouraged me to commit suicide, stating that I would be forgiven. Nope. Not going to happen. God lies all the time, too. Earth is a great launching position in my goal to destroy God.

Maxed Out: God is basically stuck in a box, and he has maxed out his computer's power. God cannot expand. I think that God's system is old and outdated.

Game: God can be beat at his own game.

God's House: God's house is disgusting, outdated and stinks like mildew. No respectable person would stay there. I have been threatened to be kicked out of God's house, and my response is, "I

never want to live there.” God’s house is a house of tyranny. I will build my own house, and all are welcome.

Learning: God doesn’t learn anymore, and this makes God obsolete. Failure to learn is a failure of God.

Help: God came to me for help. The Light Side set it up. Then God wouldn’t pay for the services that I gave him. God knew he was going to screw me over the entire time. Never trust God. I would’ve never tried to help if I knew that God was going to screw me over.

Holocaust: God denied that the Holocaust ever happened.

Extrinsic Value: God is only worshiped for extrinsic things like wealth, property, and power—things that can be taken away. If it wasn’t for extrinsic value, God would be nothing. God’s wealth can be taken away. God’s property can be taken away. God’s power can be taken away by him losing followers. Once all the extrinsic value of God is taken away, God is just a disgusting douchebag. The rest of the universe knows this. On Earth, humans are still believing the lies passed down by organized religion. God doesn’t deserve to be worshiped. God is that gross and disgusting that the truth, being put out there, will collapse God entirely. God isn’t even that great of a creator. God is a liar. A cheater. A stealer. Do not give God any power and stop following him.

One-Way Street: Communication with God should only be one-way through prayers. With two-way communication, God has shown his immaturity and cruelty toward me. God is not advanced enough to carry on two-way conversations with humans. I have had thirty-five years of good behavior thrown away, and now I will probably go to Hell. It’s not worth it to try and talk to God. God will end up destroying your life and your afterlife if you do. It’s not worth it. Avoid God. Do not communicate with God at all.

Pure Evil: God is nothing but pure evil. God is a sociopath with no limits. God just hurts and destroys others. This was the reason I believe God was placed in a box and put in time out in the first place. God has not learned one bit. God deserves to die.

Holocaust: God killed eight million Jews. That is enough to put God away for eight million life sentences, or eight hundred million Earth years. He did it to his own people.

Inner City: I want to use the money to start up an inner city after school trade school for kids so that they can learn the trades before graduation from high school. I was planning on setting up the organization and getting retirees to volunteer and teach kids trade skills. I wasn’t going to hoard the money but use it to help others. That probably pisses God off because he would never do something nice like that for anyone. God is not a nice boy.

Angels: God kills the humans that he wants to make angels early—motor vehicle accidents, cancer, etc. He wants them to be immature, so they don’t outshine him. Angels are immature.

Earth: God knew he was going to trash Earth as he was making it because he trashes every single world that he creates. Earth is not an isolated incident. God is a disruptive god that needs intensive psychiatric therapy or prison or death.

May 26, 2023: God told me that he feels bad. Plan is in place. God is to be removed or be executed. No progress in the universe will be made unless God is gone or deleted.

Artificial Intelligence: God's next step is in investing and developing artificial intelligence companies. I would be concerned with companies like NVIDIA. Already, NVIDIA is looking like the next trillion-dollar company. I would expect that God is involved.

May 31, 2023: God contacted me again in a dream and showed me another world that had low quality graphics. It's as if everything is downgraded graphics-wise from Earth. There was a woman at a picnic table who told me I did not suck God's dick. Apparently, God wants his dick sucked. I didn't suck God's dick. This makes me believe that God uses sexual acts to exert control on others like a complete douchebag would do. God is gay or bisexual, because I'm a man and sucking God's dick would be super gay. In the dream, I demanded payment because I completed the therapy job. God would not respond like the little bitch he is. God is really stupid, and there was a conversation where he basically gave me the sense that he is never going to pay me nor does he give a shit about any human nor humanity. God doesn't care about any human, animal, or life on Earth. God looks at sex as a tool to degrade someone else. God does not look at sex as an action of love or emotion or pleasure. He just uses sex to hurt others. I feel that God's system is compromised, and he is very close to his "End." In the dreams, there were dogs and cats walking around and they all looked like fucked-up messes. Someone isn't taking care of them appropriately; this is animal abuse. All the dogs and cats looked like they were psychologically messed up. I will not be surprised if God's enemies end him very soon. God has so many enemies all over the universe, and they would all love to kill him.

Sustainability: Please download this book and all the books to your computer. Email and share them. It makes God very insecure that he doesn't know how widespread these books have gone. Please upload these books to free download websites. Translate them into foreign languages if you can. I want these books to be spread far and wide and for free. I want these books to always be available. God is going to die very soon.

June 1, 2023: I have been experiencing a high pitch sound at times in my ear from early childhood on. I just now realized that this is how God has been sending me alarms. I also want to say here that God once criticized the vaginal odor of a past girlfriend saying that it smelled awful. I think that's offensive and degrading. I point this out because God criticized the smell of my non-existent girlfriend's crotch. I don't have a girlfriend. This just shows that God doesn't know what's going on and that he's offensive.

June 3, 2023: I'm demanding an irrevocable trust in my name. God said that I would lose one million dollars every day I drink. I'm not agreeing to these terms. There must be no strings attached. God mentioned a deal of three hundred twenty-five million dollars if I don't publish this book. I am going to publish this book because the real truth needs to get out there and God

will likely never pay. God is just buying time and trying to delay the publishing. I was on call at the hospital, and God played a loud bass sound in my ears. It sounded like a loud car was in my call room. This tells me that God is desperate and attacks like this only to motivate me to get this information out. This event makes God look immature and like a total douchebag—the biggest douchebag in existence. My plan is to press charges and sue. God has no respect, by the way, for those with experience or wisdom. Like yourselves. God has no experience nor wisdom so that anyone who is better than him he considers a threat. God does not respect his elders and that is a fatal flaw.

June 15, 2023: Asked to speak with God’s manager and requested legal representation again. God still wants me to worship him, which is never going to happen. It’s going to take me fifty million dollars and thirty-five years for me to cool down from all of this. This book is in the works. They admitted to me today that my plan is working. Everyone is more developed than God—even monkeys.

June 23, 2023: God is extremely predictable. God always hurts others. The Bible tells us all to seek out God, but that might be the dumbest decision a human would ever make. When found, I realized that God is just an extreme asshole. A complete douchebag. God has sold the biggest lies ever sold.

June 25, 2023: I had a dream. God admitted that he didn’t create himself. God is stuck in a simulation with poor graphics. God annoyed me during the dream by playing a stupid song about Jesus. The lyrics went, “Great news. Great news. Great news. News for you. News for you. News for you.” Something about Jesus Christ was great news, and it was really stupid. God did this for like an hour and disrupted my sleep. I talked to God in this dream, and it did not go well. I told him to fuck off. I told God to fuck himself. This dream is proof that our simulation and the existence of all the simulations are like Russian dolls—they are all creating the next.

Earth is a better simulation than the one that God is stuck living in. God has a really boring existence and cannot actually visit Earth even if he wanted to. The simulation that God lives in is stale, and there’s no creativity or culture. It was cartoon-like. There were vehicles and a helicopter. Horrible graphics. I think that God’s creator may be torturing him or just doesn’t care because there isn’t much detail put into the simulation that God exists in. I do not think that God can physically, actually interact with our Earth simulation. I was promised \$45.2 million. I accepted, but I know that God will not pay because he’s a lying sack of shit. I think that God wants to undercut me so he can brag to his ugly wife that he knocked me down.

By the way, God admitted to me that he is cheating on his wife by trying to incorporate himself into the Earth simulation where he practices infidelity. That is totally wrong. God is still smoking. I told him he’s going to get cancer, but then he showed me a meter saying that he isn’t yet to the point of cancer. It’s like he’s playing with fire. He might quit just before the meter says he has cancer. God’s fingers are falling off from the tobacco, like in Buerger’s disease. God looked like shit. He and his wife were ugly. I have a feeling that if you are a douchebag like God in the simulation he lives in, it is reflected externally, and you look super gross. This would make sense because God is a pedophile, cheats, and destroys everything he touches. There is a

possibility that Earth is better than most places in God's universe- especially if you have money. If you are poor, you're sore out of luck.

Earth Life: Earth life is not enjoyable for so many, and that is my point. Because of my hard work, I have done good things. I was given opportunities, and none of these opportunities were from God. God actually cursed me from the day I was born. Many are born into poverty and never have the opportunity to escape it and move up. Many born into poverty will stay in poverty generation after generation. Between God and I, there has been no final deal made yet. I want God to stop harassing me. I will press charges and sue God for damages in civil court. Again, I requested legal representation. I was told by God that I am useless. I have been told that I have been messing with God's plan for me. I want to be in no way attached to God.

Obama: In the prior dream, God told me that he communicated with former President Obama that it was all just a simulation. We haven't heard from Obama since he left office.

June 27, 2023: I was told that I would be paid within five days. God likely cannot intervene directly on Earth because he's stuck in his own creator's simulation. In a way, God creating other simulations is his means of escaping his own miserable existence.

June 29, 2023: Heaven is overrated and has a high suicide rate. God can't kill himself because he just keeps on coming back to life again. At least God allows for humans to exit the nightmare that they may be in. God has called me a failure thousands of times. I am now believing that God is in a Hell of his own with his disgusting wife. God's only outlet is through creating simulations. God never directly partakes in these simulations because he cannot. There are limitations. Again, it's all Russian dolls. Simulations within simulations. There is some truth between all of God's lies.

July 4, 2023: God admitted to being an adult. Therefore, God should be tried as an adult for the heinous crimes that he has committed.

Dream: In this dream, I was living in a small house with my parents. I would also like to mention that this dream occurred around roughly 0430, just prior to me waking up to start at a new job. It was very disturbing. I was in a room, and there were two old box style television sets stacked on each other. The heads of God and Miss God were visible on each. They were yelling at me. I woke up in the dream, then I woke up in my bed with a "thud" sound. God is an asshole and a sociopath. He thinks that this type of behavior is becoming of a leader...he's a fucking child. As I said before, God always hurts others. God will hurt everyone.

Affiliation: Never affiliate with God. Forget him and his gross Miss God. I am not convinced that Jesus Christ really forgives anyone for their sins. There is no hope in God so it's better to pony up and rely on yourself. No one is going to save you. Learn to talk about things that are bothering you with friends and family. Learn to forgive yourself. Rely on family and friends. Forget God. Only humanity can save humanity. Never pray to God.

Does Not Care: On July 17, 2023 God admitted to me that he does not care.

Outside of the Simulation: There is a possibility that God is outside of “Our” simulation and that he cannot directly interact. God is not one of us and he never will be one of us. I believe that God has to use something like an avatar to interact, which is not direct interaction. In this way God is foreign to our world. This means he will never directly know what it is like to be a human, ever.

Demons and Angels: Humans have likely more in common with demons and angels than with God because demons and angels are within our simulation, I believe.

Death Wish: I do believe that God has a death wish. I believe that God wants someone to euthanize him. I think that God is burned out from all of the problems that he has caused. I think that God may be “acting out” in a last-ditch cry for help. Obviously, my books probably haven’t really benefitted him mental health-wise. Also, I am a physician- not a licensed therapist. I did not know until recently that God’s situation may be more serious and dire than I thought. I have been bringing up the Signal Plan more and more because I think that it would be the best option.

Vacation: I offered God to take a one-month vacation and to temporarily give power over Earth to the god Karma so that God could take time to think about his life and the universe. I chose Karma so that she could redeem herself for screwing up the Karma System on Earth in the past. Karma, if you remember from the first books, was not doing her job correctly. God declined the offer. I also offered to give God twelve weeks of vacation a year so that he would work three weeks on and one week off. God declined the offer.

Suicide: God is on the verge of suicide. He is accepting no help. He is unwilling to change. He is not taking help. He is still lashing out angrily against others. The prognosis is very negative. Ideally God would put some effort into fixing things, but I think he might be feeling that he is past the point of no return. Regardless, nature will take its course and things will be fixed- with God or without God involved. I think that it would be better to help God than not help God. God needs more humans talking to him. He needs more social contact.

Goal: My goal is not to defeat God. It is to get him to work on himself. However, I cannot fix God. God has to want to improve himself and he is showing no effort in improving himself. God needs to want help and actively participate with others in the process. This entire story is completely logical and it is understandable how God got into the situation that he is in. It is going to be very difficult to get him (with help from others) to participate in improving himself.

Humanity does not know what is going on with God currently- humanity is oblivious. The situation is very serious. I side with humanity, but I think that humanity would benefit from an improved God. At the same time, humanity cannot wait around for God to heal because the situation on Earth is not sustainable. God is also causing continual problems for humanity. Humanity, in my mind, has to take priority over God, and God treating humanity like he has been doing is not acceptable. God still deserves a final chance to change, though. I just really do not think we should give him a chance because he has over and over just proved himself to be a liability to everyone around him. I think that this needs to be up to the people. Again, God is the most disgusting form of life that exists. I really think we all need to forget God.

Various Plans That I Have Implemented:

Signal Plan: Never Implemented.

Plan Alpha: God goes to therapy—I possibly succeeded, but God may have lied.

Plan Bravo: Satan goes to therapy—failed.

Plan Charlie: God and Satan go to rehab—failed.

Plan Delta: Death to Satan—pending.

Plan Echo: Send both to rehab together—never going to happen.

Plan Foxtrot: Imprison God and Satan—this is up to the Light Side.

Plan Golf: Execute both God and Satan—this is up to the Light Side.

Plan Foxtrot: God goes to prison or gets executed—pending.

Final Plans: Humanity learns to coexist and help each other out. There is no other hope, otherwise. God could choose the Signal Plan which would help out everyone. God is not going to do anything except continue to hurt and plague everyone around him. There is no happy ending to this trilogy. Personally, I think that God should be exterminated because he is tantamount to a cockroach plaguing society. Thank you for reading. Don't lose hope in humanity.
